Turkey Dinner Sunday

Mrs. J. Elliott, Prop.

Teachers' Convention And Banquet

Following the first session of the Hanna-Oyen Inspectorate Teachers' Convention, a banquet was held in the dining room of the National Hotel, genuine Alberta turkey, with accessories, being served.

Community singing followed, with Mr. D. Johnson pianist and Mr. A. J. Heywood conductor (both of Drumheller), and was much enjoyed by all.

The speakers were the president, Mr. J. McLean, of Craigville; Mr. Haverstock, principal of Camrose Normal; Dr. Carpenter, of Calgary Technical, and Dr. Wade, Mayor of Hanna. Wit and humor flowed fast and freely. Dr. Carpenter's description of our wonderful "North country" was intensely interesting.

On Friday, November 7th, at 9:30 a.m., Miss Twomey, of Camrose Normal School, gave an inspiring talk on "Music in the Rural School." She spoke on the purpose of introducing music into the curriculum of the public schools. It was for the culture side. She stressed the importance of regular teaching and practise in this subject. Miss Twomey said if children sing well the three principles used should be attention to tone, rhythm (including good breath control) and appreciation.

Miss A. M. Todd, of Oyen, gave a paper on "Geography in the Intermediate Grades." She showed how geography topics may be correlated with familiar surroundings. Miss Todd gave many good examples of detail work on this subject, in which she is an enthusiast. "Planning Work in Rural Schools," by Inspector Scott, of Oyen, was a very practicable talk. He stressed the necessity of studying: 1. The Course of Study; 2. The School District and Social Life of the Pupils.

Teachers should not put the minimum interpretation of the course into practise, but should broaden the work, vary the timetable and so make the daily work more interesting. Formal teaching and assignment should be well balanced in the program to make work effective.

Mr. Haverstock's subject was "Methods in Primary Arithmetic." The difficulties in teaching primary arithmetic, together with the technical method of presenting them, were thoroughly outlined and discussed. The pre-school learnings of the children should be measured up to begin with, his vocabulary playing an important part. The teaching of combinations and various devices for drill, such as use of flash cards and keys, games, etc., was advised. 162 teachers registered. 1931 Executive

The executive for 1931 was selected as follows:

Hon. Perren Baker, Honorary President; Mr. Richardson, Cereal, President; Mr. King, Drumheller, Vice President; Miss Nelson, Hanna, Secretary-Treasurer; Principals of Oyen, Youngstown, Hanna and Delia Schools, Committee—Hanna Herald.

Norman D. Stewart, who was appointed delegate from Chinook local U. F. A., will attend the Wheat Pool Convention at Calgary Tuesday, Nov. 25th.

Mr. and Mrs. Wright Lawrence had for their guests to dinner Thursday evening Mr. and Mrs. Thompson and Mr. and Mrs. Agar and son, Gordon, all of Cereal. The evening was spent in playing bridge.

C.G.I.T. Stages "Trip Around The World"

The Chinook C.G.I.T. staged a very successful "Trip around the world" dinner on Saturday evening. The dinner had certainly novelty to recommend it, and it was well patronized.

On the tickets which the girls sold from house to house, a short verse gave the clue to the first destination, which was China. Here, at the home of her mother, the door was opened by Mabel Gilbertson, in Chinese costume. Excellent rice soup was served and enjoyed by all.

A placard on the wall sent the diners off to Ireland, the home of Mr. James Rennie. Here the door was opened by a charming "colleen" dressed in green. At a table beautifully decorated in orange and green, scalloped potatoes were served.

The next port of call was Old England, where, at the home of Mrs. Bayley, a splendid lunch of excellent roast beef with Yorkshire pudding, pickles, bread and butter was served. Roses centered the table and Union Jacks decorated the walls. A beautifully lettered "England", in Old English script, hung on the wall opposite the door.

Back again to the other end of town went the merry groups of diners, seeking "Gay Paree". At the home of Mrs. Bjork the walls were decorated with pennants bearing the word "France" and with the tri color flags. A demure French damsel with cap collar and apron of white, served an excellent salad.

The next trip was also a long one, viz. to the land of Uncle Sam, where Betty Milligan served wonderful pumpkin and apple pies at tables decorated with the Stars and stripes.

The next trip whisked us off to the Orient, to far off Japan, where, at the C. N. R. depot, Eunice Bowd, in becoming Japanese kimono with chrysanthemums in her hair, served appetizing cake and tea.

Everyone was highly pleased with the fine repast, and the little walks between courses must have given a zest to the food, as all seemed to do full justice to it. It would seem that the "male of the species" likes his food served minus the perambulations required in a trip around the world dinner, for only a few men took the trip. The proceeds go to the funds of the group.

Collhorne Collections

J. D. MacKinnon, also N. D. MacKinnon and family, spent last Sunday at the home of A. MacLennan.

Geo. Hutchison completed his threshing a week ago last Monday.

Fred Belmont was one of the few who did not finish threshing before the recent snow flurry.

W. R. Morrison spent three days of last week in the city of Calgary. The roads are still open and in good shape for motor traffic.

W. Wilson and family spent Sunday afternoon at the home of N. Morrison.

Miss S. Lynn, teacher at Swan school, is now boarding at the Spreeman home.

The dance at Cloverleaf school has been postponed to November 28th. Proceeds in aid of Heathdale and Cloverleaf Christmas tree. Ladies please bring cake.

A New and Better Attitude

The world is passing through a period of depression from the evil effects of which practically no civilized nation is exempt, and the more highly developed and industrialized a nation has become, the more severely it is suffering from the prevailing depression. Undoubtedly, it is not wise to unduly dwell upon or stress existing hard times, and the tendency to do so should be resisted, but, on the other hand, it would be even more unwise to ignore facts, deliberately shut our eyes to them, and not make the required effort to overcome and shorten the present evil, seek for causes of it, and take necessary steps to prevent its recurrence.

There have been many such periods in the past, and there will, in all probability, be more of them in the future, despite all that man can do to prevent them. In fact, human failings and human greed are the underlying causes of these periods of depression, and their entire prevention will only be brought about by a complete reform of the human race. The present period differs, however, from former periods of depression in at least two important respects, both of which are the outcome of a changed attitude on the part of the vast majority of people towards our whole social and economic structure.

First, there is greater interest taken in relief measures than ever before by governments, corporations, and individuals alike. We no longer regard acute misery as necessary. We may not have learned yet how to prevent it, but there is a widespread and growing belief that the thing can be done and there is considerable willingness to make sacrifices to attain the desired end.

No longer is there callous indifference to the suffering caused by reason of unemployment. We have progressed to the point of realizing that the homeless casual laborer is not the only or even the principal sufferer in such times as these. We have learned to concentrate attention and relief upon the families of the unemployed who are permanent members of the community. We have come to realize that the difficulties of hundreds of thousands are not of their own making, and that they cannot be allowed to suffer want and utter privation. We have learned, too, that it is better to provide emergency relief work for these people than to hand out doles and make them recipients of charity.

Thus in this present period of depression we find relief works being undertaken on a scale hitherto unknown. In Canada, it means that about \$100,000,000 will be expended in order to provide temporary work for those lacking employment. This, of course, is not a cure; nor is it a preventive. It is merely an amelioration of existing conditions. It means, too, that as a people we are mortgaging our future, because these \$100,000,000 or more will be borrowed moneys upon which we must pay interest for many years to come. But it is better to utilize these moneys in providing work than to dole it out in charity. Furthermore, if the works instituted are of the right character, in a word, if they are of a permanent character and productive of good to the country in the years to come, and the money thereon is not wastefully expended, they may even prove factors in creating and maintaining a new prosperity and staying off further periods of depression.

But an even more important aspect of this present period of depression is discovered in the efforts being put forth to find out what caused the depression, and how to climb out of it, and how to avoid again falling into a similar state. We now realize that a good deal of the economic thinking of recent years has not stood the test of the last twelve months. But, as the Chicago Tribune puts it, we have not just one product of boom times; we still think that it is the business of an economic system to make for human enjoyment. Economies is not the dismal science to this generation. We know we have the productive capacity to provide a generous minimum standard of living to all who will work and we regard large scale unemployment and consequent suffering as a reflection upon our intelligence.

It is one thing, of course, to believe that a deep seated ill ought to be cured and quite another to cure it. And while there is no justification as yet for thinking that this is the last depression which we shall ever encounter, there is a considerable warrant for a tempered optimism. Some of the ablest minds in business and in the universities are directed towards the problem. We have more statistical information which bears on the causes of the business cycle than ever before. We are developing a technique for alleviating the worst effects of depressions, which will be of value even if a cure is not found. The outlook is far from hopeless.

Power From Nelson River

British Dominion Syndicate Makes Offer To City Of Winnipeg
Offer of blocks of power from the proposed White Mud Falls development on the Nelson River in Northern Manitoba has been made to the city of Winnipeg by the British Dominion Power Syndicate, it is stated. The proposal made in a letter from Sir Reginald Brade, head of the syndicate,

was referred to J. G. Glasco, manager of the city hydro system. Commencing in 1935, blocks of power ranging from 20,000 to 100,000 horsepower would be available, according to the letter. According to Mr. Glasco the offer comes "ten years ahead of the game," and cost of transmission would be very cheap. A complete report will be submitted to the civic utilities commission at its next session.

Ready For Action

Mother was trying hard to arrange a match between her daughter and the wealthy young landowner. "Beatrice," she said to her daughter, "if Harold asks you to be his wife tonight, tell him to speak to me." Beatrice nodded, and then said: "And if he doesn't ask, Mother?" "In that case, say to her mother, 'tell him I want to speak to him.'"

Blindness In Many Cases Is Preventable

Preservation Of Sight Should Be Taught In Schools
That one-half of blindness among children is preventable, and that the prevention of blindness should be first taught in the schools, is the opinion of Miss Mary C. McLelland, National Field Secretary of the Prevention Department of the Canadian National Institute for the Blind, Toronto.

Miss McLelland said that her department was in favor of text books with larger type being used, as they are in the States. A child with defective sight would have to strain to read small type at present used in text book publication. In order to consider the publication of such a book when the new reader for the western provinces comes out, a committee has been formed, with Dr. Fletcher, of Winnipeg, as head. An survey is also being made in an effort to have sight saving classes instituted in the larger cities, she said.

Television Is Improving

Spectators See Actors Distinctly At Distance Of Thirty Miles

Images as clear as those seen in the average motion picture theatre are projected by a television transmitter which has been tested in Germany. The spectators are able to observe the vividly clear pictures much as if they were at a moving picture show. The transmitter catches pictures with a sharp lens having a celerity of 50,000 light pictures a second. By the use of a photo-electric cell these light pictures are changed and transmitted on a 70-meter wave. Spectators 30 miles distant faced the lens and saw pictures of the actors with the utmost distinctness.

Danger from Colds

Every woman beyond middle age should realize that a majority of the troubles she has to fear have their origin in what are known as common colds. Each attack lowers her vitality and reduces resistance to disease. At this season of the year even a cold should be seen that her blood is toned up to meet the rigors of the climate and especially that strength should be restored after any cold, however slight. For this Dr. Williams' Pink Pills are a reliable tonic.

These pills are not a mere stimulant giving temporary relief. They build up the body by creating that which is the basis of vitality—the glow of health; steadies the nerves; improves the appetite and digestion and makes the users capable of withstanding the rigors of our Fall and Winter months. They are sold by medicine dealers or by mail at 50 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

British Columbia Apples

New Market For B.C. Apples Being Developed In South America
British Columbia apples now have a regular market at ports on the east coast of South America, according to F. C. Garde, manager of the Empire Shipping Company Limited. This development of the British Columbia market was brought about by experimental consignments made by this company last year; this year's shipments representing an increase of 400 per cent.

Miller's Worm Powders work so effectively that no traces of worms can be found. The pests pass away in the stools without being perceptible. They make an entire and clean sweep of the intestines, and nothing in the shape of a worm can find lodgment there when these powders are in operation. Nothing could be more thorough or desirable than their action.

Siam Entry For Grain Show
The Kingdom of Siam, through its Ministry of Lands and Agriculture, is making preparations to be officially represented at the World's Grain Exhibition and Conference at Regina in 1933. Siam's exhibit will consist of varieties of that country's best rice.

Large Sum For Civic Improvement
About two thirds of a million dollars have been expended by the City of Trail on civic improvements during the past seven years, according to the latest figures from the city hall.

Some People Lucky With Blind Purchases

King's Warehouse In London Sells Some Valuable Parcels
What the Lost Property Office is to an ordinary railway, the King's Warehouse, situated in Lower Thames Street, London, England, is to the Customs and Excise Department of the British Government. Here are dumped articles and merchandise left unclaimed by the individuals to whom they have been consigned, plus a considerable proportion of confiscated smuggled goods. From time to time these articles are put up for auction, and great bargains are not infrequently picked up. On one occasion a small cart, labelled "contents unidentified," was knocked down for a few shillings. When the purchaser took it home and opened it he found it to be nearly half-full of a solid, waxy substance somewhat of the appearance of marble which proved to be ambergris, that precious product of diseased whales worth about \$50 an ounce. There were approximately 40 lbs. weight of it in the cart, and it was sold for about \$3,000. Another time a lucky bidder obtained possession, for the sum of half-a-crown, of a small cardboard box, listed in the catalogue as containing "seashells," eggs—various. On examining his purchase, he found amongst the eggs one of the Great Auk, an extinct species of sea-fowl. Later on, it realized at auction for its fortunate finder the nice little sum of \$1,800.

"Audible Museum" In Berlin

Phonograph Record Made In 1908 Is Among Collection
The piercing wail of a grief-stricken Korean, the merry song of a Roumanian tailor, the whoop of an American cowboy and the lingering call of a Spanish night watchman are some of the audible sounds which can be heard in an "audible museum" soon to be established in Berlin under the direction of the Ministry of Posts. A recently found primitive phonograph record of Count Zeppelin's voice in which the father of the airship appeals to the German people for support of his project will also be included. This record dates from 1908, shortly after a disaster to one of his airships at Echterdingen, and includes the words: "In a few years my airships will conquer the world." Acting on the belief that appropriate sounds intensify the impressions a visitor receives from displays, the Ministry intends to incorporate a series of phonograph records with various exhibits, which interested folk may turn on and hear the voices of such men as Edison, Marconi, Lindbergh, and others of historical interest, as well as sounds from other lands and other times in so far as they are collectable and recordable.

Proved His Honesty

A pick and shovel bought on credit 17 years ago from George Paine, of Ashabula, Ohio, hardware merchant, has just been paid for. Paine received a letter, postmarked Michigan City, Ind., containing \$2 and the following note: "Seventeen years ago you trusted me with a pick and shovel. I told you I would pay you the first time I found \$2. I just found it today. Here it is. The honest men are not all dead yet."

Asthma No Longer Dreaded. The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will always do all that its makers say, you have not yet learned how safe you are with this preparation at hand get it today and know for yourself.

Origin Of Common Expression

The expression "to put a spoke in the wheel" would suggest adding strength to a wheel, although actually the saying is used to indicate that somebody's progress has been barred. It has its origin, however, in the fact that when vehicles had solid wooden wheels. Holes were made in some of these so that the driver who wished to put on the brake could do so by pushing through one of the holes a piece of wood, called a spoke, and thus prevent the wheel from revolving.

Minard's Liniment refreshes the scalp.

Peace River Bacon

Bacon Hogs Now Shipped In Carloads From Peace River To Vancouver
Less than 30 years ago, the Peace River District of Alberta, an extensive area of country northwest of Edmonton, was considered even by some agricultural experts as unsuited for productive farming. It is now one of the best wheat and other grain producing areas in Canada and also is growing in importance in mixed farming. Bacon hogs are now being shipped in carloads to Vancouver. Among the principal buyers of the Peace River hogs are the Vancouver Department Stores. Housewives of that city say that the bacon from Peace River is of the finest quality and like Oliver Twist they want more.

One of the most recent Canadian winners of the world's wheat prize at the International Grain and Hay Show, Chicago, was from the Peace River country, namely, Herman Trele, of Wembley. Joseph H. B. Smith, of Wolf Creek, Alberta, last year's winner, is also an Alberta farmer, but is located outside of the Peace River District.

Safety League Formed

Officers Are Elected At Meeting Held In Regina

A safety league for Saskatchewan has been organized following a meeting of representatives of the government with representatives of the cities and clubs of the province held at the parliament buildings, Regina.

Lieutenant-Governor H. W. Newlands was made honorary president, while Hon. A. C. Stewart, Minister of Highways, was elected president.

Other officers who were elected at the meeting included: Honorary vice-presidents, Premier J. T. M. Anderson, Hon. M. A. Macpherson, Hon. J. A. Merley, Hon. F. D. Munroe and Hon. F. R. MacMillan, M.P. Vice-presidents, His Honor Judge W. O. Smyth, Chief Justice, Sidney Smith, Regina; Richard Loney, Moose Jaw; Ralph Miller, Prince Albert; Mayor L. A. C. Pantan, North Battleford; C. H. Garner, Weyburn; Mayor John W. Harb, Saskatoon, and Mayor Robert Barbour, Yorkton.

Why suffer needlessly? Douglas's Egyptian Liniment brings quick, sure relief to sore feet, sore corns and warts. Relieves inflammation. Removes proud flesh.

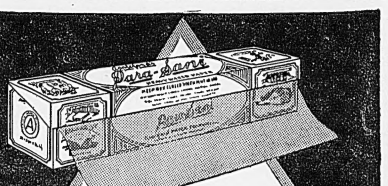

Fifty-Fifty

"I'm afraid we've made rather a mess of your field," said the male member of the picnic couple to the farmer on whose grounds they were camping. "Never mind," the farmer replied, "you should see the mess the village youngsters have made of your car."

Suffered From Heart Trouble Became Weak and Run Down

Mrs. Wm. Dlott, Glenside, Ont., writes:—"For a long period I suffered from heart trouble, and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her of my trouble. She said she had had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a short time she had been relieved of her trouble, so I got two boxes and after taking them I was again feeling fine, and always recommend H. & N. Pills to anyone complaining of heart trouble."

Sold at all drug and general stores, or mailed direct on receipt of price by "The T. Milburn Co., Ltd., Toronto, Ont."

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh, delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exciting uses ask for Appleford's "Centre Pull" Packs in sheet form.

Army Of Enumerators Will Be Employed In Taking The Decennial Census Of Canada

Fourteen thousand enumerators, 245 commissioners to direct their work, and a considerable number of others, will find employment next year in the taking of the decennial census of Canada.

The commissioners — one for each electoral district — will be appointed right after New Year, while the enumerators will be chosen in March or April, to permit of study and instruction prior to the actual date of the census, which will be on June 1st. The census taking, of course, will require considerable time varying in accordance with areas covered and the density of population. But what is to be put down are all the facts and figures as they may be on June 1st, regardless of what changes may occur later, before the census is published. It is necessary to fix on some arbitrary time, and the density of population.

Awaiting the approval of the Government just now and to be promulgated as soon as this sanction is forthcoming are the regulations governing the census of Canada. There are several new features. Each successive census being more elaborate, past experience not only here but in other countries will be availed of. The Bureau of Statistics is constantly exchanging ideas with the international statistical organization. In the new schedules, complete as they have been heretofore, there will be further details of agriculture and industry, and the point over which some contention has arisen as to Canadian nationality will be covered. A person who says he is simply a Canadian will be put down as such, although it is denied that in the past it was impossible to make such distinctions.

The census must also take into account some seeming anomalies in the law. For example, under the immigration act, even a Britisher must be in Canada for five years before he can acquire Canadian domicile, and yet if he has been here only six months he can vote or even be eligible for election to Parliament. The schedules will be so numerous as to set forth all the facts concerning the individual and his origin from away back.

One of the entirely new features this time will be the use of aeroplanes in the northern regions, which, 10 years ago, had to be covered on foot or by canoe or dog train. Incidentally, the tabulation was delayed until these returns came in. Next year, they will be as prompt as the rest.

While the census is taken completely only every 10 years, check on it is kept from year to year, and the figures are such as to indicate a normal growth but an extraordinary increase in population. Although quite an army of competent people will be required for the census business, the problem will be only one of selection, because there will be plenty seeking the jobs. The appointments are to be made by the Government and not under the Civil Service Act, and so political influence may count.

Predicts Speedier Planes

Rocket Craft Expert Believes 3,000 Miles Per Hour Possible

Herr Fritz Von Opel, German rocket craft expert, predicts the airplane of 12 years hence will be a rocket propelled conveyance that will fly 25 miles above the earth at a speed of 3,000 to 5,000 miles an hour.

"I think it sounds ridiculous to talk of travelling 5,000 or even 3,000 miles an hour," said Von Opel, "but in a few years that speed will be commonplace. Theoretically my experimental planes will do that now, but they have not been developed on a practical basis."

The United States has at least 85 species of native golden rod.

Judge: "Why didn't you report the burglary straight away instead of late the next morning?"

Witness: "The thief took my watch, my money and my only pair of trousers." —Hummel, Hamburg.

W. N. T. 1924

Encourage Swine Industry

Saskatchewan Government Arranges For Easy Purchase Of Breeding Stock

Encouragement of the swine industry in Saskatchewan is promised under a new arrangement, according to Hon. W. C. Buckle, Minister of Agriculture. Under this arrangement, farmers will be enabled to purchase sows for breeding purposes through the Department of Agriculture upon making a payment of 25 per cent. of the cost and giving notes for the balance.

"In recent years, while we had a 50 per cent. cash option for the purchase of swine," Mr. Buckle said, "most farmers preferred to pay cash. This year on account of the scarcity of money, we are inaugurating this new plan."

(By Annette)

C-891

YOUTHFULLY FLATTERING HOUSE FROCK ADOPTS EMPIRE LINES—SUITABLE MISS OR MATRON

You'll like its slender lines. The pointed treatment of the gorset skirt emphasizes the smart quaint basque bodice. The partial belt arrangement does much toward concealing lip breadth. The open V-neckline with pointed collar is particularly becoming.

It's the choice of the smart woman who is always fastidious in the selection of her home frocks.

Style No. C-891 may be had in sizes 16, 18, 20 years, 36, 38, 40, 42 yards of 30-inch material with 3/4 yard of 39-inch contrasting and 1/4 yards of binding.

It's very attractive to have one's house frock agree with the kitchen colour scheme.

It is sketched in deep blue and white dimity with white piping collar and blue bindings.

Men's striped cotton shirting, tingham checks, pin dotted broadcloth and tweed-like cottons make up lovely in this model.

Would Require Simplifying English would make the most suitable international language, if its irregular spelling could be simplified and a few other complexities smoothed out, a Swedish professor of language declared.

Substitution Of Barley For Corn

Experimental Stations Are Testing Feeding Value Of Both

A question which is causing considerable study this year is that of reducing the amount of corn purchased by Canada and the substitution of barley, a home-grown feed. The feeding value of barley as compared to that of corn is being given careful study at several experimental stations and already there have been several definite recommendations made for the use of this grain in at least partial replacement of corn.

The large part of the Canadian importations of corn go to the feeding of hogs and poultry. For the former, the barley has been long proven to rival corn as a feed both in its value as a fattener and for a part of the ration of the growing hog. The quality of finish produced by barley, in conjunction with oats or other feeds is generally believed to be superior to that of the corned hog.

In the poultry industry, the use of barley in place of corn is not nearly so well established. There is a certain vitamin value obtained from the use of yellow corn in the poultry ration which is rather difficult to replace when other feeds are substituted. General indications are, however, that the corn content of the laying mash can be substituted at least partly by barley and, with the ordinary spread in price between the two, it will probably be found profitable to do so. For fattening chickens there is reason to believe that a good percentage of well ground barley in the feed will work out quite satisfactorily.

Barley and corn are both known as high carbohydrate feeds, and, with the exception of the difference in hull formation and in the vitamin content of the yellow corn pigment, may be considered in much the same light as fairly strong, heat producing and fattening feeds. Should the price spread favor barley existing during the coming winter and especially if the feeder has a quantity on hand, he should be quite safe in using a considerable portion of it in place of the corn he might ordinarily buy.

Saskatoon Poultry Association

Egg Laying Contest Organized To Run For A Year

The Saskatoon Poultry Association has organized an egg laying contest, beginning November 1st to run for a year on similar lines to that of the Dominion Government. The object is to secure for members of the Association trap nest records of individual birds for the twelve months which will furnish valuable data to those who are desirous of increasing the egg-laying propensities of their flocks, but who have not time nor facilities for conducting the breeding of true-to-type birds that will lay a profitable number of eggs of good size and color.

B.C. Motor Truck Company

A motor truck manufacturing company established in Vancouver 21 months ago at a cost of a quarter of a million has been very successful. Its production for the first nine months of the year more than equalling that of the whole of last year.

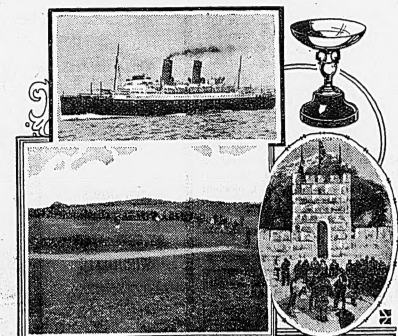

She: "Silence gives consent, you know."

He: "Except when you ask a banker for a loan."

Policeman—Miss, you were doing fifty miles an hour!

She—Oh, isn't that splendid! I only learned to drive yesterday!

HEAVY WINTER TRAVEL IS PREDICTED

Here in picture are some of the reasons advanced by Canadian Pacific Railway and Steamship officials for a prediction of heavy winter travel on the prairies this year. Lower left, a scene at the Empress annual mid-winter golf tournament in Victoria, to be held this winter from February 23 to 28, with, top right, a drawing of the E. W. Beatty challenge cup, the principal emblem. Top left, the Canadian Pacific steamship "Duchess of Bedford," with other ships of the line, will take thousands of holiday makers to the Old Country for Christmas. Lower right, a scene at the annual Banff Carnival, to be held after New Years at the mountain resort.

Canada's Fish Industry

Should Get More Support From Canadian Consumers

Business men have stimulated and more work can be found for our own people through the persistent purchase of Canadian instead of foreign goods. In no sphere of life can this policy be more easily followed or its good effects be more quickly seen than in the every-day use for the household, especially of food. It is strange that though Canada has the finest fisheries in the world, the consumption of fish at home is relatively small; and, at the same time, we seem to think it necessary to buy considerable quantities of foreign fish year after year. The imports in 1923 amounted to no less than \$4,174,568.

If we reduced the imports of foreign fish and eat more of our own the fishing industry would benefit enormously, and no industry is more worthy of encouragement. Fisheries, from both inland and on the two seas, are plain people who buy almost exclusively goods made in Canada. Is it not reasonable for consumers in Canada to reciprocate by making more use of Canadian fish, and thus to increase the purchasing power of Canadian fishermen? The industry has an importance which perhaps people who live inland do not appreciate, for the capital invested in it is nearly \$60,000,000 and the annual production is worth more than \$50,000,000. The money realized from the fisheries is spent with manufacturers of iron, brass, rubber, cordage, flour, textiles, engines, clothing—in fact, its ramifications are felt throughout the country, and directly or indirectly it gives employment to many thousands of workmen, hundreds of miles away from the scene of operations. If each family in the land consumed even a few more pounds of Canadian fish it would give a great stimulus to an industry which already contributes so largely to the prosperity of Canada.—Toronto Mail and Empire.

Livestock Sales

Figures For Past Ten Years Shows Heavy Business Done At Moose Jaw Stock Yards

"During the past ten years," says "The Optimist," "some 792,994 cattle, 51,081 calves, 698,345 hogs, 258,944 sheep and 15,112 horses were handled through the stock yards at Moose Jaw, according to figures computed by the Southern Saskatchewan Co-operative Stock Yards. In other words, more sheep and swine were handled through the Moose Jaw yards in the period under review than the entire number of sheep and swine present in Saskatchewan in 1923. In that year there were in Saskatchewan 1,166,913 cattle, 207,551 sheep, 599,909 swine and 1,122,757 horses.

Punished Enough

The scene was a revival meeting, and during the course of the evening a masculine woman rose and spoke on the value of kindness. "Look at my husband," she said. "He's allus been a terrible trial, but how does I treat him? When he comes home from The Pig and Whistle the worst for drink, what does I do? Do I hit him? No. Do I swear at him? No. Do I clear out an' leave 'im? No. I just puts me arms round his neck and kisses him."

A voice from the back of the hall called out, "Serves 'im jolly well right."

Howell—Do you work for a living?

Powell—I work for it, but I don't get it.

Study Of The Whole Field Of Federal And Provincial Taxation Is Thought Necessary

The ever widening problem of raising revenue for administration purposes and public undertakings by both provincial and the federal governments, has reached a stage that calls for thorough examination of the whole field of taxation, according to views advanced at the convention in Toronto, of the Canadian tax conference and the Canadian civil service research conference.

With delegates in attendance from widely separated parts of the Dominion, the conference applied itself to the study of the country's tax structure and offered suggested remedies in meeting some of the more outstanding problems.

Duplication and lack of uniformity in taxes levied in the various provinces, should invite tax reformers into action, declared A. E. Cryslar, of Toronto Board of Trade. Lack of uniformity, he said, proved a baffling problem for business interests operating over a large section of the country, while overlapping arising in connection with the income tax was often considered "unfair."

In a paper submitted by Prof. H. R. Kemp, Department of Economics, University of Toronto, two primary problems were set forth: How to secure increase of revenue needed to meet the commitments of the Dominion, and how to improve present arrangements for obtaining revenue.

The Federal Government, he said, faced a deficit of about \$40,000,000 while the provinces and municipalities were also confronted with the need of augmented revenues to meet obligations and undertakings. As means of meeting these needs he suggested excise duties might be levied on certain low-priced commodities, citing sugar as an example. This suggestion, however, met with disfavor in the subsequent round-table discussion. Prof. Kemp believed there were other channels of revenue that might be explored, with the federal income tax possibly slightly raised.

As a remedy for some of the existing tax evils, Prof. Kemp advanced a thorough investigation into the double taxation of corporations in excess, periodical conferences be-

tween provincial authorities, and a general study by every branch of the whole subject of public debts and taxation.

Alluding to taxation in relation to the country's net production, Mr. Cryslar declared that in 1928 the increase in taxation revenues had been more rapid than the increase in the total net production. In that development he detected a dangerous portent. "We may soon have the heaviest taxation of all imposed on the citizen in the leanest of all years," he said.

A paper by J. G. Hay, Commissioner of Taxation in Winnipeg, dealing with assessment of urban land for taxation purposes, provoked general discussion.

Mr. Cryslar, reviewing taxation changes in 1930, stated the present trend was to extend the gasoline tax, the motor income tax, Mr. Bridges recognized, he said, the income tax was unpopular because of its tendency to penalize the honest to the advantage of the dishonest. He forecast a "lively legislative interest" and a "progressive softening" of the income tax.

A one-cent-per-pound tax on sugar said Prof. Kemp, would raise at least \$9,000,000 a year for the Dominion. "Sugar," he argued, "is now selling at a price no higher than that prevailing before the war, and at less than the cost of production. Such a tax, though retrogressive, would, perhaps not be unduly burdensome to consumers who have paid over 25 cents a pound for sugar in the past."

Two prominent Toronto business men, William C. Coulter and George Argeron, led the general attack on the proposed income tax. Mr. Bridges asserted the governments of the world received an all time lesson against excise taxes on such necessities when Britain lost the American colonies through the tea tax.

It was also suggested by Prof. Kemp that collection of municipal taxes be made by the federal authorities, who would then turn the amount over to the municipal authorities. This, he said, would increase the net revenue from the tax. "Various public utilities also could yield large revenues in case of necessity," he added.

Shows Great Variation

Every Country Has Its Own Manner Of Eating

Nothing is more curious than the different manners of eating which are correct in different countries. We leave succulent gravy on our plate, because good manners forbid that we should soak it up with a piece of bread. A la France to leave that gravy would be considered extremely rude, and the daintiest eater would certainly chase the last elusive drop round the plate with a soft piece of bread. The correct way to sup soup with us is from the side of the spoon, but to do this in Germany would mark one as not knowing the habits of polite society; there it must be inhaled from the end of the spoon. Another—to us—curious custom is the French one of resting the hands always on the table directly they have finished a course; to sit with them in the lap is not good manners. This reminds us of a story of a woman told once of a foreigner her father asked to the house. At dinner the first night asparagus was served, and the visitor, having watched furtively what other people did, ate it in his fingers as to the manner born. The next night leeks appeared as a vegetable, and the young man, quite sure of himself this time, started on it happily, taking it in his fingers as he had done the asparagus. Now, did the laws of perfect breeding demand that all the people in the house should follow suit, or not? It is related of a perfect host that on one occasion when entertaining some visitor whose table manners were not very well drilled, and who took up his finger bowl, and drank from it, he, after one glance round the somewhat astonished table, took up his finger bowl, and also drank from it!

Champion Sheep Shearer

Interesting Contest At Saskatchewan Annual Sheep and Swine Show

H. Swinehart, Hinton, was adjudged the champion all-around sheep shearer when a contest was held at the exhibition grounds, Regina, in connection with an annual Saskatchewan sheep and swine show. A Simpson, Regina, gained second place in the contest, which was judged by W. C. Heron, Hinton; L. J. Rushton, Rocanville, and W. W. Thomson, western manager of the Canadian Co-operative Wool Growers Association.

Sheep shearing results follow: Hand shearing contest—1. A. Simpson, Regina; 2. H. Swinehart, Hinton; 3. Archie Stewart, Abbotsford; 4. Calvin Fraser, Mather, Man.; 5. J. Whitehead, Nutana, Sask.; 6. Ben Wilson, Shellbrook; 7. J. Bayne, Semans; 8. John Brisbane, Laura.

Machine shearing contest—1. H. Swinehart; 2. John Jones, Bangor; 3. J. Whitehead, Nutana.

Arthur Hovos, Hinton, was announced the winner of the Heron challenge cup, donated for annual competition by W. C. Heron, Hinton, Sask., for the best Saskatchewan bred Oxford sheep, three years or under. The cup was won in 1923 by A. M. Barnett, Hinton.

New Exchange Building

The officials of the Winnipeg Stock Exchange are being commended for their decision to go ahead with their construction programme which involves a new exchange building to be erected on Main Street at a cost of about \$25,000.

"Where are you hurrying to?"

"I've missed a misfortune."

"What is that?"

"Meir is getting married." —Hummel, Hamburg.

The Magnetic Compass

The magnetic compass has been in common use for more than 700 years and it is more widely used today than ever before. On the seas, under the seas, on, above, and under the earth it is used for finding direction. It is necessary to the sailor afloat or in a submarine; to the surveyor and explorer on land; to the airman who flies overhead and to the miner who burrows below in deep pits.

The pathway to success may be uphill—but it never is crooked.

How Women Lose Fat In England

How would you like to lose unhealthily fat that you don't need and don't want, and at the same time feel better than you have for years?

How would you like to lose your double chin and your too prominent abdomen, and at the same time make your skin so clean and clear that it will compel admiration?

How would you like to get your weight down to normal, and at the same time develop that urge for activity that makes work a pleasure and also gain in sanitation and keenness of mind?

Get on the scales to-day and see how much you weigh—then get a bottle of Kruschen Salts. Take one-half teaspoonful every morning in a glass of hot water, and when you have finished the first bottle weigh yourself again.

Now you will know the pleasant way to lose unsightly fat, and you'll also know that the six vitalizing salts of Kruschen have presented you with glorious health.

That's the way Englishwomen keep slim—why not you?

WORLD HAPPENINGS BRIEFLY TOLD

A small sheet of the first commercial zinc produced in Manitoba was sent Mayor Webb by officials of the Hudson Bay Mining and Smelter Company at Flin Flou.

Toronto's first and only woman bandit, 17-year-old Kathleen Boyle, of Buffalo, N.Y., sentenced last April to two years in reformatory, has been released on parole.

A stump buried through the roof of the camp building during blasting operations killed the infant daughter of Mr. and Mrs. William Schunter, Sugar Lake, B.C.

With the immediate object of putting the Canadian fishing industry on its feet, Hon. E. N. Rhodes has arranged for an exhaustive survey of marketing catches at every stage from the fisherman to the consumer.

Canada could aid in the economic recovery of Australia by buying more Australian goods, Lord Stonehaven, former governor-general, said in Victoria.

Announcement has been made by E. W. Beatty, president of the C.P.R., of the acquisition of a site facing Berkeley Square for the big hotel proposed to be erected by the company in London, England.

A telegram from Tientsin announced the death of Bertram Lennox Simpson, British author, who wrote under the name of Putnam Weale, from wounds inflicted by three Chinese gunmen who invaded his house and shot him in the back.

The Prince of Wales is understood to be planning to sail for South America, January 15, on the ship which has been arranged for him to open the British Trade Exposition at Buenos Aires. He will pay visits to other parts of South America and the West Indies.

Grassy Lake Coal

Coal Obtained By Methods New To Commercial Mining In Alberta

The recent shipment of a car of high grade lump coal, billed from Grassy Lake, Alberta, to Winnipeg, is of unusual interest. Apart from the marking the revival of coal shipments—for Grassy Lake was shipping coal to Saskatchewan in 1908—this shipment has a special interest in that the coal was obtained by methods new to commercial mining practice in Southern Alberta. Future shipments will be watched with considerable interest.

Holstein Herd Has Good Record

Three Holstein cows, members of a herd owned by James A. Thomson of Moose Jaw, have just finished yearly records in the R.O.T. with a production averaging 13,657 pounds of milk containing 657.50 pounds of butter.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.

Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy.

A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleaned and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pkgs.

The Deadly Monoxide

Four Points Motorists Should Remember About This Poison Gas

Every motorist who is tempted on cold mornings to start his car in the garage and allow the engine to warm up with the doors and windows of the building closed, should remember these four points about the deadly carbon monoxide gas—

You can't see it!
You can't smell it!
You can't taste it!
But it is deadly!

Keep the doors and windows of your garage open when you have the motor running, or better still, don't let it warm up until you are in the driveway.

Don't run your motor in a closed garage. Statistics show that the hazard of carbon monoxide poisoning, while not very prevalent when compared with other accident dangers, is gaining rapidly. Last year there were more than twice as many deaths from this cause as in 1924. In 1928 and 1929 death rates from carbon monoxide poisoning showed a steady increase.

Many physicians claim there is no antidote for it. The first thing to do is to get the victim out into the air as quickly as possible, endeavour to bring him back to consciousness by means of artificial respiration and, possibly, use oxygen.

(By Annette)

916

THE SMART SCHOOL GIRL TYPE KILLED FLAILED SKIRT—UNDENIABLY CHIC DETAIL

It's so entirely girlish yet so entirely sophisticated.

The slightly monied bodice presents a trim tailored air. The neck is particularly becoming in square effect, finished with a flat collar. Buttons down the center-front are decorative.

The skirt is given a graceful swing with wide panel effect at the front with killed plaits at either side and back.

It's Oh! so simple to make. The outfit unbelievably small.

Style No. 916 is designed for the important age of 8, 10, 12 and 14 years.

It is shown in dark green crepe patterned woolen. The buttons are green enamel to match the enameled belt buckle.

Covert cloth in wine red is very jaunty.

Dark blue wool jersey with vivid red buttons and completed with red leather belt is very smart and practical.

Size 8 requires 2½ yards 39-inch material.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Some Mighty Midgets

Many Small Creatures Stronger In Comparison Than Large Ones

It has been proved that the common snail can draw a load which is fifty times heavier than itself. If an elephant were as strong, in proportion to size, it would have to move nearly 270 tons.

That is only one specimen from Nature's collection of "mighty midgets" that perform in secret on land and in the sea.

Even the strongest men find it difficult to lift more than their own weight. Yet, a bluebottle fly can lift more than 30 times its own weight, while it can draw a load that is 150 times heavier than itself.

Objects which are about forty times heavier than themselves are often carried by the mason wasps.

You have seen those ear-splitting powerful drills which are used to tear up the road? Well, there is a mollusc, known as the piddock or phore doctyla, which can rival their power, and is a superior worker, as it makes no noise.

Silently, but none the less efficiently, the piddock bores through the hardest rock as casually as if it were soap.

Recipes For This Week

(By Betty Barclay)

OATMEAL COOKIES

- 1½ cups special cake flour, sifted.
 - 2 teaspoons baking powder.
 - ½ teaspoon salt.
 - 2 teaspoons cinnamon.
 - 1 teaspoon cloves.
 - ½ cup butter or other shortening.
 - 1 cup sifted brown sugar.
 - 1 egg, well beaten.
 - 1½ cups oatmeal.
 - ½ cup milk.
- Sift flour once, measure, add baking powder, salt, and spices, and sift together three times. Cream shortening, add sugar gradually, and cream well. Add egg. Add oatmeal and flour, alternately with milk, mixing well. Drop by teaspoons on greased baking sheet and bake in moderate oven (350 degrees Fahrenheit) 18 to 20 minutes. Makes 4 dozen cookies.

THANKSGIVING CONSERVE

- 3 cups cranberries.
 - 1 cup diced apples.
 - 1½ cups water.
 - 1 cup crushed pineapple.
 - 1 lemon, juice and grated rind.
 - 2 oranges, juice and grated rind.
 - 3 cups sugar.
- Cook cranberries and apple in the water until tender. Add pineapple, lemon and oranges and sugar. Mix well and cook rapidly until thick and clear. Turn into sterilized glasses and when cold cover with paraffin.

Evidences Of Prosperity

Times Do Not Appear To Be So Bad In This Western City

Among a number of evidences of prosperity in Edmonton, cited by "The Journal," is the fact that the number of telephones in use has increased within a year from 16,124 to 16,841, or over 500. Another evidence is that "one wholesale house in this city sold \$30,000 worth of radio sets in September"—thus showing a fair volume of luxury spending.

Award For Canadian Scientist

E. M. Kindle, chief of the division of paleontology, Dominion Department of Mines, is the recipient of an award by the United States National Research Council, it is announced at Ottawa. The award was made in recognition of Mr. Kindle's geological investigations.

Lubricants are being made from olive oil in Spain.

Chapped Skin

Wind, snow and sleet bruise unprotected skin surfaces. Minard's heals the raw skin tissue and affords full protection.

SUNDAY SCHOOL LESSON

NOVEMBER 23

THE RICH YOUNG MAN—REFUSING A LIFE OF SACRIFICIAL SERVICE

Golden Text: "And He said unto all, 'If any man would come after me, let him deny himself, and take up his cross daily, and follow Me.'"—Luke 9:23.

Lesson: Mark 10:17-27.
Devotional Reading: Psalm 107:1-14.

Explanations and Comments

Refusing a Life of Sacrificial Service, verses 17-22.—In Matthew the rich young man's question reads: "What good thing shall I do, that I may have eternal life?" and Jesus' reply is "Why askest thou Me concerning that, which is good?" Mark and Luke give the question as, "Good Master what shall I do that I may inherit eternal life?" and the reply of Jesus is, "Why callest thou Me good? None is good save one, even God."

Jesus' question as given here seems to indicate that the young man had used the word "good" (Good Master) with as little thought as we do when we say "Good Morning." Jesus would have him weigh his words and see whether he meant what he said. If he were calling Him good in the sense in which God is good, Jesus would accept his homage. Jesus always wanted those who came to Him to give him possessions of the poor and to come and follow Jesus, do you not think that Jesus would then have said to him, "You may keep your wealth and use it rightly, for now you are no longer under its snare, you have ceased to put it first in your thoughts, you now have room in your heart for me?"

The Choice the Rich Young Man Made.—It was a dramatic moment when the young man was face to face with a great choice. The warning which Jesus gave in regard to the difficulty of the spiritual life for the wealthy shows that the young man's decision when he turned away sorrowful, was to keep his wealth and not follow the Master. Wealth which another rightly might possess and rightly use, was for him a snare for it kept him from following Christ. Not only did he have great possessions but the great possessions had him. He loved them too much. They deprived him of a vision of God and of the needs of others.

"His soul was like a boat tied fast but tied with a long rope," said Phillips Brooks. "It was able to stand up the channel, past headland and light and buoy that marked the way; but always something held it back from perfectly laying itself at rest beside the golden shore. 'What lack I yet?' And then said Jesus, 'Go and sell all that thou hast, and follow Me.'"

One of the world's really "rare metals" is columbium, for only about 25 pounds of it exist today in sheets, bars, rods, and wire.

Oil men have borrowed an idea from dairymen by using the cream separator to extract petroleum from tar and sand.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

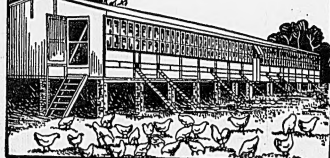

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

Canadian breeders of poultry and live stock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

SOUR STOMACH

JUST A tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard anti-acid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes. Don't depend on crude methods.

Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids.

Remember—the genuine is always a liquid. It cannot be made in tablet form. Look for the name Phillips' on the wrapper for your protection. Druggists everywhere have the 50c bottles.

Canadian Tobacco Production

Total 1930 Crop Given As 36,712,700 Pounds

Enough tobacco has been grown in Canada so that if distributed among the population would provide each man, woman and child with over 3½ pounds. The total crop for 1930 is given as 36,712,700 pounds or nearly 7,000,000 pounds more than in 1929. This year's crop was grown on 41,391 acres, 32,170 of which were in Ontario, 9,000 in Quebec and 221 in British Columbia. Ontario accounted for 28,078,000 pounds of the total production. Quebec, 5,490,000 pounds and British Columbia, 344,700 pounds.

For several years several million pounds of tobacco have been exported to the British Isles, and it is expected that this year a considerable percentage of the crop will be exported.

Salt Refinery Plant

The Arden Vancouver Salt Company proposes to erect shortly a refining plant on False Creek to refine about 10,000 tons of salt yearly, bringing the raw product either from California or from the evaporation beds in the British West Indies.

Oil men have borrowed an idea from dairymen by using the cream separator to extract petroleum from tar and sand.

Horses From Royal Ranch

Exhibits From Prince Of Wales Ranch Win At Portland, Ore.

Eight Clydesdale horses and one Percheron exhibited from the ranch of H.R.H. the Prince of Wales, at the recent Pacific International Livestock Show at Portland, Oregon, carried off eleven first prizes and one second. The entries also were awarded all the championships in the Clydesdale classes, the one second prize being awarded in the case where two horses from the Prince's string were shown in one class.

The entries from the Prince of Wales ranch, which is at Pelskist, Alberta, about sixty miles southwest of Calgary, were widely advertised prior to the opening of the show, and the horses were stabled in a special section decorated with the Prince's colours—scarlet and purple.

Canadian Exhibit Wins

The Canadian stand at the Ideal House Exhibition at Edinburgh, Scotland, has been awarded the gold medal for general excellence, beating out 100 other exhibitors. The stand was prepared by the Dominion Government Exhibition Commission.

MEAGRE RESULTS OBTAINED FROM IMPERIAL PARLEY

London, Eng.—Right Hon. Philip Snowden's victory over the Imperial conference is now clear. He may give way to the extent of allowing a stabilization period of three years for the present, preferences because he needs the revenue, but that is the best the Dominions can hope for.

It is admitted that nearly every vital point of his economic policy will be shelved until a further conference, presumably the Imperial Economic Conference to be held in Ottawa. This, apparently is acceptable to Premier R. B. Bennett, because he knows the political feeling of the British people, which anticipates that the Conservatives will be back in power by then and will be able to do something towards reciprocal tariffs.

The Dominions are disappointed at the meagre results of the conference and are turning to one another for the creation of a series of treaties between themselves, based on the principle of reciprocal tariffs.

These negotiations are shrouded in mystery because of their delicacy, but one of the Dominion premiers remarked to the British United Press that there was only one thing to be really grateful for, and that was that the conference provided an opportunity for the heads of the various Dominions to get together and lay down the basis of future commercial treaties between themselves.

On the constitutional side, the Dominions are very pleased. The appointment of native born governors-general by direct advice from the Dominion premiers and without the advice of the minister of the mother country, is conceded, but the King will decide the "suitability" of the man named.

However, this condition is so elastic that it is easy to foresee that if the King decides that the previous political affiliations of one of those recommended makes him not suitable, another name must be submitted.

Will Carry Out Mandate

Premier Ramsay MacDonald Refers To Government's Position In

London, England.—Premier Ramsay MacDonald assured the House of Commons that parliament would have a full opportunity to discuss the White Paper on Palestine before any ordinances were framed on its basis.

In response to questions, he reiterated government's assertions that the recent White Paper, regarding the British attitude towards Jews and Arabs in Palestine, had been misinterpreted and said the government intends to carry out its obligations under the mandate to both sections of the Palestine population.

Pensions Board

Western Pensions Tribunal To Hold Sittings In The West

Winnipeg, Man.—Members of the Western Pensions Tribunal, appointed under the revised Pension Act, to adjudicate on western applications for pensions, commenced their sitting in Winnipeg recently. Majority of cases to be dealt with are those previously turned down by the former pension board.

Dates of western sittings are: Regina, November 24-25; Calgary, December 1-5; Vancouver, December 8-20.

Has First Plane Crash

Charlottetown, P.E.I.—Prince Edward Island's first aeroplane crash occurred at Lot 16 when a "plane owned and piloted by H. S. Jones, of Apohaqui, New Brunswick, fell from a height of about 25 feet. The plane, with Charles Yeo, of Lot 16, as a passenger, and Jones at the controls, made a good take-off, but the engine stalled and went dead shortly after the machine left the ground.

Plan World Exhibition

Sydney, Australia.—When the Sydney Harbor Bridge is opened here a "World Exhibition" will be held commemorating the event. It is expected that the exhibition will be held some time in January. It will include displays of agricultural, industrial, mining and artistic materials.

Plan Was Rejected

London, England.—The British Government definitely rejected the Canadian offer of reciprocal Empire tariff preferences put forward by Premier R. B. Bennett at the opening of the Imperial Conference.

W. N. U. 1884

Air Lines Across Canada

Company Being Formed To Operate Coast To Coast Service
Toronto, Ont.—Formation of a transportation company, to be known as Canadian Airways Limited, is well under way.

The plan has been endorsed by the government, thus enabling the C.N.R. to participate with the C.P.R., Western Canada Airways Limited, and the Aviation Corporation of Canada, in the formation of a large company of air transportations.

Headquarters are being established in Montreal, with James A. Richardson as president and Sir Henry Thornton, head of the C.N.R., and E. W. Deady, head of the C.P.R., as joint vice-presidents. There will be 13 directors, representative of leading financial and commercial interests in Canada.

Mr. Richardson, who is director of several aviation and financial organizations, and also sole owner of Western Canada Airways, will be the largest shareholder. Each of the railways will subscribe \$250,000 of the capital involved, which amounts to a total of \$200,000 shares of no par value. Their contribution at the present time is small.

The new organization will operate in two sections, known as Eastern Canada lines and Western Canada lines, each providing a highly organized passenger, mail and express transit service by air.

Within a very short time, it is understood, passengers, mails and express will be carried from coast to coast within Canada.

Great Future For Vancouver

Minister Says Coast City Will Become Greatest Port In The World

Vancouver, B.C.—Vancouver's political allegiance is Vancouver's own business, and regardless of it, the duty of the Minister of Marine is the development of transport facilities of this port, which promises to become the "greatest in the world."

Such was the statement of the Minister of Marine, Hon. Alfred Durneale, in the course of an address before the Vancouver Canadian Club recently.

"The port of Vancouver, I believe, is destined to become the greatest in the world," said the minister. "It requires no great imagination to visualize that within the next quarter of a century it will be the centre of a huge trade with the Orient. Vancouver is the gate of British North America for commerce such as was never dreamed of by the merchants of ancient Asia."

Let he be criticized for making "the oration of a lawyer," the speaker reminded his hearers that some of the country's leading capitalists were lawyers.

"What this country needs is men of action in business as well as politics," he said. "They alone can put a stop to the trade depression which this country, in fact all countries, have suffered during the last couple of years. They alone can bring us back to the practical thoughts, to the sound methods which lie at the very foundation of Canada."

"Marigold" To Visit Regina

Delightful Play Which Has Drawn In Montreal and Toronto, Appears For Three Days

Regina, Sask.—Some shows that reach Regina with an all-star cast direct from London, England, may be stretching the point, but "Marigold," which will play at the Capitol Theatre for three days commencing Monday, November 24th, can truthfully claim to be a London company.

"Marigold" is a delightful play by L. Allen Harker and F. R. Fryer, of the Queen Victoria period. The Queen's visit to the Scottish capital, Edinburgh, starts a romance that is the basis of the play. It will be a welcomed addition to the theatrical season of Regina, and should obtain excellent support, because real live actors will tread the boards of the stage and give flesh and blood performances.

The splendid cast will include Sophie Stewart, Ellis Irving, Lionel Gadsden, Edmund Beresford, Royston Taylor, Marguerite O'Leary, Winifred Ord, Yvette Pienne, Walter Roy, Gordon Pettie, William C. Aldous, John Lauriston, Marie Shields and Jean Clyde, daughter of the famous Scottish star, John Clyde. Yvette Pienne is the only member of the cast who was not with the London company when the play was produced there. She stepped into a French part when the original girl could not cross the Atlantic owing to illness. "Marigold," which has had wonderful receptions in Montreal and Toronto, should delight Regina when it opens at the Capitol Theatre for a three day run.

White Foxes Drive South

The Pas, Man.—White foxes, the most prized quarry of northern trappers, have been seen 50 miles from this northern Manitoba centre. Scarcity of caribou in the Barren Lands is believed to have driven them south in search of food.

Sees End Of Bolshevism

Predicts That Soviet Russia Will Turn To Capitalism Within a Year

New York.—Sir Percival Dewhurst Perry, chairman of the Ford Motor companies of Europe, predicted, on his arrival on the S.S. Bremen, that Russia will become a capitalist state within a year.

"There is no question but that Soviet Russia will recognize capitalism within a year," Sir Percival said. "They have seen the writing on the wall, and with the anticipated collapse of their five-year plan, there is no doubt at all that they will revert to capitalism to avoid a revolution."

Accompanying Sir Percival were Maurice Dolfus and Dr. Karl Wilhelm Hauss. The group will confer with Henry Ford at Detroit.

To Eliminate Radio Trouble

Street Cars In Moose Jaw Are Equipped With Condensers

Moose Jaw.—Street cars in Moose Jaw have been equipped with condensers with a view to eliminating much of the radio interference in the city, according to an announcement made recently by J. Leibold, secretary of the Moose Jaw Radio Association. The condensers have been installed as a result of negotiations between radio dealers in the city and the street railway company. They are installed on the generators in the street cars.

ROYAL ADDRESS AT OPENING OF INDIAN PARLEY

London, England.—The future of India's millions was cast into the caldron of the momentous round table conference when the King, in a hopeful speech, opened in the gallery of the House of Lords on November 12.

A scene splashed with Oriental splendor such as rarely has been viewed before in the western world was the setting for the ceremonial inauguration of the important negotiations, the gravity of which was stressed in the royal address and those which followed, by Premier MacDonald, the Indian princes and the delegates from India.

East met west round two large oval tables, one set within the great red and gold hall, scene of the opening of the five-power naval conference last winter.

A few minutes before noon the King entered the hushed hall. Centred in the colorful gathering was the golden throne chair from which he addressed the assembly. In conventional morning clothes, the King made an impression by the fervor of his address.

From his red spectacle case he took rimless glasses, looked them behind his ears, and slowly and carefully read his speech.

"No words of mine are needed to bring home to you the momentous character of the task to which you have set your hands," he said in an appeal for solution of the great problem of the future system of government for India. "Each one of you will, with me, be profoundly conscious how much depends to the whole of the British Commonwealth of the issue of your consultations. This community of interest leads me to come forth and it is a happy

ON TOUR IN WEST

Rev. James A. Findlay, delegate from Church of Scotland, who is now touring United churches in the west.

arguery that there should be present today the representatives of my government in all the sister states of this commonwealth.

"I shall follow the course of your proceedings with the closest and most sympathetic interest, and indeed without anxiety, but with a great concern. The material conditions which surround the lives of my subjects in India affect me greatly and will be ever present in my thoughts during your forthcoming deliberations.

"I have also in mind the just claims of majorities and minorities of men and women, of town dwellers and tillers of the soil, land owners and tenants, of the rich and the poor, of the races, castes and creeds of which the body politic is composed.

"For these things I care deeply. I cannot doubt that the foundation of self-government is in the fusion of such divergent claims into mutual obligations and in their recognition and fulfilment. It is my hope that the future of the government of India, based on this foundation, will give expression to her honorable aspirations.

"May your discussion point the way to a sure achievement of this end, and may your names go down in history as men who served India well and whose endeavours advanced the happiness and prosperity of my beloved people. I pray that Providence may grant you in bounteous measure wisdom, patience and goodwill."

His Majesty spoke but a few minutes. He shook hands with Premier MacDonald, bowed left and right to the delegates, and left the hall escorted by the Lord Chamberlain. The Indian conference was inaugurated.

Four furniture movers took the throne away and replaced it with a chairman's seat while the Maharajah of Patiala, with his double pearl earrings bobbing against his black beard, proposed that Premier MacDonald take the chair. Aga Khan, head of the Indian Moslems and Great Britain's leading race horse owner, seconded the motion and Mr. MacDonald stepped forward. He spoke, not extemporaneously as usual, but with studied care, reading from a precisely worded address.

"We are met," he said, "to try to register by agreement a recognition of the fact that India has reached a distinctive point in her constitutional evolution. Whatever that agreement may be, some will say that it is not good enough or that it goes too far. Let them say so. We must boldly appeal to an intelligent and informed public opinion."

TROPHY PRESENTATION

George M. Inverarity and J. K. Christison, of Carberry, Manitoba, winners of the Canadian Pacific Manitoba Boys' and Girls' swim club competition. The lucky ladies, in addition to the trophy shown being presented to them by C. B. Stockill, assistant to the vice-president of the Canadian Pacific, win a medal apiece and qualify for a free trip to the Royal Winter Fair at Toronto.

Predicts Another War

General Ludendorff Sees the Annihilation Of Germany In 1932

Berlin, Germany.—Another great European war in 1932, resulting in the annihilation of Germany, is predicted by General Erich Ludendorff in a pamphlet published recently.

In this 29-page pamphlet, the one-time World War military giant expresses the belief that the war, beginning May 1, 1932, will find Germany, Austria, Hungary, Great Britain and Soviet Russia opposed to France, Poland, Czechoslovakia, and Rumania.

He visualizes Germany as the battleground of the nations, with her cities razed by air attacks, her civilian population left to their fate and the nation's youth perishing in masses on the battlefronts.

Although he believes the war will last but a few weeks, he imagines Berlin held in a vice-like grip by the enemy forces, who mercilessly drive the fugitives back into the city's confines to die of starvation.

He sees German culture as receiving its death blow and the terrors of the 20-years' war surpassed.

Vorwärts, in commenting on the pamphlet, recalls that Adolf Hitler, at the time of his abortive speech in November, 1923, selected Ludendorff as his minister of war, with the object of organizing a "war of revenge."

Attempted Assassination

President Cosgrave Of Irish Free State Has Narrow Escape

Dublin, Ireland.—An apparent attempt against the life of William T. Cosgrave, president of the Irish Free State, was made on Monday night, November 10, it was learned here.

The would-be assassin, who had prepared an ambush on the highway leading to Cosgrave's home, opened fire on the motor car carrying the president, and an accompanying car. Bullets struck both machines but none of the occupants were injured.

President Cosgrave was returning to his home in the Fort Dubh mountains at the time of the shooting and was without his usual armed escort. Neither driver was armed and hence no immediate search was made for the gunman, who, the great number in the history of the institution, and those in charge are beginning to worry about berths for others if the turnover of the courts in Saskatchewan and Alberta continues to be as heavy. Temporary accommodation has been provided for 100 of the prisoners, for whom there are no permanent cells. A new wing, designed to accommodate 200 men, is in the course of construction but will not be ready for at least two years, so little hope of relief is expected from this score.

Government officials were reported "most disturbed" by the occurrence.

LARGE SUMS FOR PUBLIC WORKS IN THE WEST

Ottawa, Ont.—Details of public works to be undertaken by way of unemployment relief in Western Canada, totalling \$1,455,041, were announced by Hon. G. D. Robertson, Minister of Labor.

The sum of \$52,400 is provided for improvements to the Prince Albert National Park in Saskatchewan. In addition \$38,841 is provided for road improvements and sewers in municipalities, distributed as follows: City of Swift Current, \$29,341; village of Kincaid, \$1,500; village of Shellbrook, \$2,000; village of Shaunavon, \$1,500; village of Shamrock, \$500; village of Pennant, \$1,000; village of Coderre, \$1,000.

Works authorized in Manitoba total \$235,000, and include the expenditure of \$20,000 in improvements to the Riding Mountain National Park. The remainder consists of road improvements in municipalities as follows: Ritchie, \$1,250; Tache, \$1,250; North Kildonan, \$68,000; St. Vital, \$25,000; East Kildonan, \$114,265; St. Paul, \$1,250; Brooklands, \$6,250.

The expenditure of money on these works has been approved by the Dominion Government and contributions to the undertakings will be made out of the \$20,000,000 unemployment relief fund established by parliament at the recent special session.

The list of works for British Columbia is more extensive than the others because a considerable part of the expenditures in Manitoba and Saskatchewan was announced a week ago and the program of works proposed in the province of Alberta has not yet been completed.

In British Columbia there are still municipal public works amounting to \$188,632 and provincial undertakings amounting to \$4,000, particulars of which have been received by the Dominion Government. The expenditures will cover a wide range of works, including road improvements, sewer construction, improvements to national parks, construction of parks, waterworks, airports, sidewalks, school grounds and bridges.

TO BOOST TRADE BETWEEN CANADA AND THE ORIENT

Kobe, Japan.—Five committees from the delegates of the Canadian Chambers of Commerce trade missions are holding a series of conferences with representatives of business men from Kobe and Osaka. The committees were appointed, under the heads of wheat, minerals, lumber, fish, and Canadian imports, and Canadians and Japanese business men are together trying to explore all avenues leading to the accomplishment of the object of the mission, namely, increase of trade between Canada and Japan to the mutual advantage of both.

The mayor and Chamber of Commerce of Osaka entertained the trade delegation today. The vice-president of the chamber and John M. Imrie, Edmonton, exchanged felicitations, and hoped for a continuance of the expansion of trade between the countries. The feature address was given by J. O. Cameron, Victoria.

S. H. Sarsley, of Montreal, addressed a luncheon at Kobe on Canada's development, historic, political and economic.

Following the luncheon the delegates were the guests at a reception given by the Canadian Academy, President Bates and Principal Trench described the beginning and growth teaching 200 pupils, most of them of the institution, which was now children of Canadian missionaries. Mr. Imrie expressed the thanks of the delegates for the reception, and remarked that Canada was obviously exporting her hearts and minds and ideals.

The governor of Kansai prefecture, the mayor of Kobe, and the local chamber of commerce were hosts to the delegation at a banquet, at which Mayne D. Hamilton, Vancouver, gave an address.

Penitentiary Crowded

Saskatchewan Institution At Prince

Albert Cramped To The Doors
Prince Albert, Sask.—The Saskatchewan penitentiary here is crammed to the doors with 538 prisoners, the greatest number in the history of the institution, and those in charge are beginning to worry about berths for others if the turnover of the courts in Saskatchewan and Alberta continues to be as heavy. Temporary accommodation has been provided for 100 of the prisoners, for whom there are no permanent cells. A new wing, designed to accommodate 200 men, is in the course of construction but will not be ready for at least two years, so little hope of relief is expected from this score.

Canada's Rights Recognized

Title To Northern Islands Formally Announced By Norway

Ottawa, Ont.—The government of Norway has formally recognized the Canadian title to the Arctic Islands commonly known as the Sverdrup Group, comprising Axel Heiberg, Ellik Ringnes, Amund Ringnes and King Christian. This friendly action on the part of the Norwegian government removes the one possible ground of dispute as to Canadian sovereignty in the whole Arctic section north of the Canadian mainland.

Announcement that Norway has given formal recognition to the Canadian title of these northern islands was made by George Perley, acting prime minister.

Canadian Delegates Welcomed

Kyoto, Japan.—The City of Kyoto welcomed the delegates of the trade mission of the Canadian Chambers of Commerce here. The government, mayor and president of the Chamber of Commerce tendered the delegates a luncheon. The Mayor of Kyoto expressed his pleasure at the opportunity of meeting the Canadian representatives.

Bad Season For Fishing

Halifax, N.S.—Further word of poor conditions on the Canadian Labrador were received here with arrival of the trading schooner H. H. McIntosh, Captain Edgar McCarthy said the worst of the fishing season on the Newfoundland Labrador had been a success, the Canadian territory had experienced one of the worst seasons in its history.

Needed Longer Test

London, England.—Squadron Leader R. S. Booth, commander of the dirigible R-101, said that if the Imperial Conference had not been in session, officers of the dirigible R-101 would have insisted upon additional flight trials before that ship left on the voyage which ended in the crash near Beauvais, France.

Air Mail Service

One Hundred and Seventy Tons of Mail Carried by Planes East and West

For the three months ended September 30, the aircraft engaged upon the 12 air mail services which now operate in Canada carried 119,301 pounds of mail, bringing the total from the beginning of the current year up to 379,424 pounds, or roughly 170 tons. One half of the services operate out of Montreal.

Two new services are projected, according to the quarterly report of the civil aviation branch of the Department of National Defence. One will run from Amos to Slesce in Quebec, 42 miles, and the second from the Peace River to North Vermilion in the North West Territories. The latter calls for 16 return trips during the winter and will be continued for four years.

The report shows that there are 500 aircraft flying in Canada, while the number of pilots is 717, of whom 403 are commercial pilots. The Dominion has 72 air harbors.

Exceeding Eastern companies in mileage, were the Western Canada Airways Ltd., Winnipeg, Man. These flew 413,013 miles, carrying 5,564 passengers, 316,893 pounds of baggage and express and 76,572 pounds of mail. The percentage of regularity on schedule times was rated at 97.4.

The report says that 14 intermediate airmails are being leased, fenced in and graded with runways between Moose Jaw, Saskatchewan; Saskatoon, Saskatchewan, and Lethbridge-Edmonton, Alberta, a distance of approximately 500 miles. An airway beacon is being installed on one corner of each airfield, while five radio beacons are being installed at present at Forrest, Man., Regina, Sask., Maple Creek, Sask., Lethbridge and Red Deer, Alberta.

There are 21 light airplane clubs in the Dominion. For the nine months ending September 30, members of these organizations had flown 11,567 hours. The membership totalled 2,887. Ontario has the largest number of flying clubs, with nine. Saskatchewan has three, Manitoba and Alberta, two each, British Columbia, one.

A Boon To Motorists

New Non-Skid Road in Chelsea, England, Pronounced Success

A road surface which is claimed to eliminate all danger of skidding, is now being manufactured from Boston asphalt, mined in the island of that name in the Dutch East Indies, and a recent demonstration in the borough of Chelsea, England, was regarded by the borough engineers and others as a success. After the road which had been treated with the material was watered, a number of motor cars were driven along it at high speed and brakes were applied violently, but there were no traces of skids, and when the drivers tried liberally to make the cars skid they could not do so. Its non-skid qualities are believed to be due to a natural and uniform mixture of bitumen and shells.

An Interesting Building

Jerusalem Chamber Near Westminster Abbey, London, England, Has Historical Associations

At the foot of the Wren Towers of Westminster Abbey, is a low, grey stone building known, after certain tapestries which used to hang on its walls, as the Jerusalem Chamber. It was built by Abbot, Elyington in 1376, and in it the abbots of Westminster entertained their guests. Here died Henry the Fourth, and here Henry the Fifth became King. Here the Committee for the revision of the Bible worked for four years. Here Addison and Sir Isaac Newton lay in state. This beautiful chamber is cedar-paneled, and contains fine ancient glass and a contemporary portrait of Richard the Second.

"Late again. Have you ever done anything on time?"
"Yes, I bought a car."

He: "Remember, darling, that the doctor has forbidden you to bathe."
She: "Yes, but he hasn't forbidden me to wear a bathing costume."
En Rolli! Half Timma, Gotthenborg.

W. N. U. 1884

What Machinery Does

Displaces Labor But Makes Vast Number Of New Industries

An English newspaper which makes a feature of publishing extracts from its files of one hundred years back included one recently which stated that "an assemblage of about 400 agricultural workers at Hardness, Kent, proceeded in a body to destroy the threshing machines in the neighborhood."

England was then much more of an agricultural nation than it is now. The lower classes were largely a peasant people to whom farming represented a ready source of employment, and it is quite natural that they should regard with dismay the introduction of machinery that tended to supplant manual labor.

The same thing happened fifty years earlier when Richard Arkwright invented machinery to do the work of cotton spinners. Mobs destroyed his machinery and burned down his mill at Chorley, Lancashire. But machinery has been of untold benefit to farms, it multiplies cotton about the biggest single industry in England.

Men could scarcely be blamed for their attitude toward machinery in those days. They could not foresee the revolution it would bring about, nor the markets it would create by cheapening and increasing production at the same time. Had the example of those workers been generally followed and a ban put upon the introduction of machines in all forms of industry, human progress and prosperity would have been held back to a degree that is inconceivable.

Machinery displaces a lot of labour in some respects, but at the same time it made a vast number of new industries, including that of making machinery itself. Taking the widest view of the circumstances it is doubtful if machinery has ever displaced a single workman.

At the beginning of this century, there was an infinitesimal number of automobiles. Had a powerful farm bloc in every Parliament in the world pushed through legislation to ban the "horseless" (as it was originally called), on the ground that it would injure the horse breeding industry, what would have been the state of world unemployment today?

Ten years ago there was no commercial radio. Today hundreds of thousands of people are engaged, directly and indirectly, in the vast service of broadcasting. Were radio sets not turned out by the million every year, those people would swell the ranks of unemployed.

And who can predict what new industry will be employing hundreds of thousands of men and women ten years hence?—St. Thomas Times-Journal.

The Woman Farmer

Increasing Number Taking Up Agriculture in Western Canada

The Over-Seas Daily Mail (London), says: Quite one of the most pleasant spots in which to ramble in this England of ours today is the neighborhood of a training farm for girls or one of those farms which are mainly in the hands of those efficient young women who are happily more numerous than used to be the case. Here you seem to have been transported into a youthful world of abounding health and vigor.

I am told that more women than ever are taking up agriculture for work, many with the idea of seeking homes in one of the Dominions ultimately, others as gardeners or poultry women at home, and others to use the latest farming knowledge on parental farms. Established farmers seem keen enough now to give their daughters really practical education of the latest and best kind at the best available schools, so that they can be of use not merely for the dairy but in all branches of the industry.

Large Amount of Mail Carried According to the Postmaster-General's annual blue book, 8,274 pounds of mail were carried on the Winnipeg-Calgary and Regina-Moose Jaw-Edmonton air mail routes during the department's fiscal year ending March 31, 1930. In all 180 single trips were scheduled and 173 actually carried out with a total of \$2,653 miles flown. On all Canadian routes during the 12-month period, some 25 in all, a total of 425,280 pounds of mail were carried and 688,219 miles flown.

Doctor Defends High Heels

High heels have kicked up a lot of discussion, pro and con, but have found a staunch defender in Dr. Frazer Gurd, of McGill University Medical School, Montreal. The elevated heel, he told the practitioners attending the International Medical Assembly at Minneapolis, not only eliminates the cause of flat feet, but prevents the wearer from fracturing her ankle in case of a fall.

#ins C. P. R. Scholarship

Clifford Brown, Lennoxville, Quebec, has been awarded the Canadian Pacific Railway scholarship at MacDonald College in connection with the Junior Golf Club competition held recently at Sherbrooke, according to an announcement made by Dean Barton of MacDonald College. The successful candidate entered the Division Course at MacDonald, commencing on November 1.

One hundred boys from club clubs throughout the province took part in those competitions and, of these, thirty-seven were eligible to compete for the scholarship offered by the Canadian Pacific Railway Company. These thirty-seven boys came from twenty-one different clubs and seventeen counties in the province extending from Argenteuil to the north shore of the Ottawa to Temiscouata on the south shore of the St. Lawrence.

Clifford Brown, a member of the Lennoxville Golf Club, obtained a score of 543 out of 600 on judging, 96 out of 100 on his general efficiency as a club member, 45 out of 50 on an oral examination, and 35 out of 50 on his exhibit, a total of 719 out of a possible 800 points. His nearest competitor was Stanley Dolg of St. Jerome, who obtained a total score of 714 points.

The scholarship is tenable at any agricultural college in the province of Quebec, and the winner elected to attend MacDonald College.

Housekeeper Gets Exercise

Walks Yearly Distance Equal To San Francisco From Boston

For some time elaborate tests have been conducted to ascertain how far various types of people walk as they do their usual work or play.

It has been learned that we average almost 8 miles a day, although a policeman was checked at 14 miles a day and a letter carrier at 22. A police walked 8 1/2 miles playing 18 holes (no mention was made of his score).

A housekeeper, without leaving the house, walks every year a distance equal to that from Boston to San Francisco, but when this woman goes down town to shop she averages about 8 1/2 miles in the stores alone.

The Geodetic Survey Of Canada. The Geodetic Survey of Canada, of the Department of the Interior, plays an important role in the development of the Dominion, providing by its work an accurate basis for all kinds of other surveys whether relating to the making of maps or charts, the laying down of interprovincial and other boundaries, or the construction of power-houses, dams, canals, railways, irrigation ditches and the like.

Flood lighting of church exterior is being tried in England.

JAPANESE STUDENTS AT TORONTO UNIVERSITY

Above are shown Miss Patricia Sugarmori (left), young Canadian-born Japanese Varsity student of Vancouver, and Miss Tami Maruyama, another young lady of Japanese birth, who are the female representation in the newly-formed Japanese students' club at the University of Toronto.

Mind Would Keep Pace

Natural To Suppose Healthy Old People Would Have Active Brain

An eminent United States surgeon and doctor, discussing efforts being made to extend the span of human life, has stressed what he considered the futility of added years of bodily strength if the mind continued to weaken about the usual time. But would it? Isn't it logical to suppose that if the sound body be carried on toward the century mark in man's life the sound mind will keep it company? This authority rather scoffed at the idea of promoting greater length of years, but this is not a good attitude to adopt toward old people. There is nothing more beautiful in life than serene and happy old age accompanied by good health, even though physical strength be weakened.

The garnered wisdom of a life well lived develops in the minds of old people a philosophy that should be the envy of those who still are struggling in the vortex of world activities, competing in the mad race for wealth, fighting for eminence in public affairs, striving after social distinction, and the other evanescent glories of the world. Old people do not care anything about these things. They have seen wealth vanish in a day; they have seen the public turn and rend its favorites of yesterday; and they know that the top of the social ladder is a position of the greatest peril.

If youth would listen to old age, benefit by its advice and experience, and pursue a more rational method of living, there would be more vigorous centenarians than there are today, and no doctor or other authority, no matter how eminent, would dare hint that they are on the way. Longer and longer live the old folk!—Toronto Globe.

Playing Steady Game

Good Golfer Tells What Is Wrong With Business

The business visitor responded to the usual question of "How's business?" with the reply: "Vile!"

"I play golf and enjoy it. My normal game is somewhere around the middle 80's. The other day everything was just right, my temper and my digestion and all the things that help or hinder the game. The result was that I made a 79."

"Now suppose when I'm asked what sort of a game I play, I should say, 'Oh, I break 80.' Suppose I should feel that everything was wrong every time I don't land in the 70's. As a golfer of time would I have as a golfer?"

"And that's been one of the troubles with business. Many companies 'broke 80' in the first half of 1929, and because they failed to do it in the first half of 1930 they think they are completely ruined when the truth is they are playing a good steady game and improving a little bit every day."—Nation's Business.

Chinese Taking Over Jobs

The day when a foreigner could obtain a good job with the Chinese government and amass a fortune in a few years, is apparently over. Highly trained Chinese are replacing foreign employees in almost every branch of the Chinese government service. A month now seldom passes but what several foreigners who thought they had life jobs, see their posts turned over to the Chinese.

Canada's First University

In the town of Windsor, Nova Scotia, a tablet has been erected by the National Parks of Canada Branch, Department of the Interior, commemorating the founding of King's College, in 1789, the first university in British overseas dominions.

Problems Of The Farm

Chances Have To Be Taken On All-Round Profitable Harvest

That famous airship whose destruction brought consternation to the world of science and of enterprise, perched on the millionth chance "She's as safe as a house," said the designer of her sister ship, "except for the millionth chance." Unfortunately for her, the adverse powers that lurk about every life and every enterprise saw to it that this triumph of human skill and daring should be confronted by that chance. When so faced up, this mechanism designed to show man's conquest of the air proved as helpless as a bubble in Niagara gorge.

Farmers are continually confronted with the millionth chance. Some seem to be able to dodge the issue or what is more likely, they are dealt with so tenderly by the forces that work for man's defeat that they rarely never have any serious difficulties. In many cases these folk listen to their own conscience, which is not fatal still, they listen to the words of the flatterer and become a little more daring and reckless generally. Then the millionth chance emerges and the cattle will not fatten profitably, the grain is caught with heat or drought at the wrong stage of its development, or the weather is at the wrong period of the market or investments go wrong persistently and proud man is tossed up on the shores of failure. For a farm has more problems than any airship in existence. The dairy, the poultry yard, the field—all of these bristle with problems. There are all the risks of the market and of social life. Wise folk sometimes smile at the farmer's maxim "You never can tell"; but those few words express precisely the atmosphere in which the farmer persistently lives. An airship is far more likely to make a successful voyage than is a farm likely to yield an all-round profitable harvest.

Light In Ocean Depths

Recent Discovery Shows It Is Purest

Levels of the ocean provided with violet-colored daylight, like a scene in the theatre illuminated with the purest violet light, are reported by the American Museum of Natural History as a recent discovery of the expedition of the New York Zoological Society now exploring the ocean off Bermuda. Dr. William Beebe, leader of the expedition, made fifteen deep-sea dives, some to depths of over 800 feet, using a new steel diving sphere. Windows of clear fused quartz protected the outside pressure of over six hundred pounds to the square inch and permitted the observers to look out. Close to the sea's surface, they found, the light was ordinary daylight but as the sphere descended all red and yellow colors of the spectrum faded out completely. Next the blue colors faded, leaving nothing but the pure violet rays at the extreme end of the spectrum where the wavelengths of light are shortest. At depths of 700 feet and below, the outside world of water still seemed to glow dimly with these extreme, almost colorless violet rays.

Resume Reindeer Trek

Delivery Of Herd From Alaska Will Likely Be Effected On Time

Canada's herd of 3,000 reindeer is once more on the trek across the roof of the world. Latest advice to the Interior Department, at Ottawa, indicate the drive of those animals, which was temporarily suspended during the summer and fall months, has been resumed and delivery of the reindeer on the eastern slopes of the Mackenzie River delta will probably be effected on scheduled time.

When the drive began last November, the stipulation was that the animals should reach the grazing grounds near the mouth of the Mackenzie River early in 1931. Purchase of this number of reindeer from the Loman Corporation of New York was made by the Canadian Government in order that the Eskimos and Indians in that northland might have their food supplies supplemented.

Private Planes In England

The number of privately-owned aeroplanes is steadily increasing in England. Nearly 300 men and women in the country now operate their own 'planes and more than 24 own two or more ships each. Many business men are securing 'planes for their offices, and one quarry uses 'planes to send out samples of stone by air to its customers.

Captain and mate wrote the ship's log alternately, and the mate being drunk, the captain faithfully recorded: "The mate is drunk today."
On the following day the mate, seeing what had been entered concerning himself, faithfully recorded: "The captain is sober today."

Prevention Of Diphtheria

Diphtheria Can Be Wiped Out and Lives and Dollars Saved

If for ten years or less, Canada were to pay as much money towards preventing this disease as Canadians now pay for curing it and burying its victims, it could be virtually eliminated. And yet at the present time 15,500 Canadians experience expensive and dangerous attacks each year, with 1,200 annual fatalities.

So you see, a great national work is being left undone.

How does diphtheria arise, and how can its ravages be averted? First of all it is a germ disease. A healthy human child (children are diphtheria's victims for the most part) who happens to be susceptible to this disease, is suddenly attacked by a number of tiny, invisible germs. These lodge in the youngster's throat and feed and multiply. They give off a waste product which is a deadly poison; and this poison spreads throughout the system. A victim of diphtheria dies of poisoning, just as surely as though he had swallowed a deadly poison.

However, death as we know does not always result, for the germs do not have things all their own way. Certain formations and substances have been placed in the human blood by nature to fight against infection. Often, this defending army of the bloodstream wins the fight against the invading army of diphtheria germs, and when that happens, the patient gets well.

Now once recovered, such an individual rarely gets the disease again. The defending army in his bloodstream has learned how to repel the attacks of this particular germ.

Comparatively recently, doctors have discovered a substance called "Toxoid" which, when injected into a human body, induces the blood to develop a more powerful army of bloodstream to win the fight against the invading army of diphtheria which, a patient painfully develops, it is now possible to give to a child by a simple, safe series of injections under the skin.

Every family doctor can administer this treatment and it is up to all parents to make sure that their family doctors do so. It is safe and simple and sane and practically painless. At one time the City of New York immunized 10,000 infants with toxoid, without any ill-effects whatever.

How much simpler to have your children undergo this simple treatment than to have your house quarantined and possibly lose a child or two through diphtheria! If only every parent and health department would see that this marvelous substance be put at the disposal of every parent, and if only all parents would insist upon protecting their children with it, diphtheria could be wiped out of Canada within ten years, and hundreds of lives and thousands of dollars saved every year.

Likely To Be Popular

Increased Demand For Canned Whole Chicken Is Expected

In his annual report, recently published, the veterinary director general of the Dominion Department of Agriculture calls attention to the increase in the number of poultry products processed under government inspection. The packing trade are canning more meats and poultry in Canada, and there appears to be room for considerable development in the field of canned chicken. Canned whole chicken made its appearance on the market last year and from the reception accorded it, the new business is likely to develop into one of considerable proportions.

Canadian Cattle Welcome

A welcome for Canadian cattle at the port of Birkenhead, England, was promised by Mayor T. McClellan, when the meat trade section of the National Union of Distributive Workers, of which he is national organizer, made a presentation. They could confidently expect to receive a considerable proportion of the 15,000 cattle available for export before the end of the year, he said.

There are more than 8,000 varieties of dahlias on the market.

"That stupid Frenchman is sitting on my hat and I don't know a word of French."—Hummel, Hamburg.

ENO'S "FRUIT SALT"

To Feel Your Best

Take a dash of ENO'S "Fruit Salt" in a glass of water every morning. Millions do this daily because they know that ENO—gentle, effective, non-habit-forming—is the deadly foe of constipation.

In cases of acid stomach, fatigue, biliousness—ENO is invaluable. For more than sixty years it has been the standby in thousands of well-regulated homes.

But remember, only ENO can give ENO results.

CHAPTER IV.—Continued.

"He wouldn't have complained in any case," Gay answered loyally. "That's Nick, Mr. Bartlett. He may not altogether like what life gives him, but he makes the best of it. By all the rules of the game he should be wading in the Pacific, or on the way there, but he has chosen to stick by me. I'm going in now to wash up. Train travel is an abomination. While I'm gone Nick can tell you our problems, and then I'll tell all the things he's forgotten!"

She arose, her hand tightening a bit on her husband's shoulder, and with a smile for the old man she went within. Nick sat quite still for a moment, looking down at the maples in the valley: a gorgeous panorama in gold and crimson.

"No," he said thoughtfully, harking back to the old man's question, "I've never set foot out of New England; yet I thought when Gay and I started off together—" He smiled, as if envisioning something very far away. Then the smile vanished, and he said soberly: "Mr. Bartlett, the biggest thing in life has come to us."

He looked up, meeting the old man's untroubled gaze.

"—I'm surprised," said Simeon Bartlett quietly. "Remember I knew you as I asked what brought you home. Nuthin' else would 'a' held either of you back from conquerin' the world. —You— you ain't by any chance lettin' yourself feel disappointed, boy?"

"I can't you know, for Gay's sake," Nick answered quickly. "though I'll admit that for just a minute I was—well—stunned. All in a breath the plans of my whole life had to be changed about—changed quickly, so Gay wouldn't know I minded ever so little. Perhaps you

can't understand, sir, but ever since I was a little shaver I've dreamed of doing what we set out to do. More than anything in the world I desired my freedom. Freedom! What is freedom, Mr. Bartlett, when the look in a girl's eyes has a greater hold on one than the broad highway?"

The old man rocked gently for a moment.

"Freedom," he said at last, "is just another name for happiness. Some finds it some ways, Nick, and some another. They'll likely come times, boy, when the highway'll call so hard it'll be like drawin' teeth to keep from runnin'; but the freedom a man finds in his wife's eyes ain't a bad sort to hold onto. You just hold onto it!"

"So far," Nick answered, with a queer little gesture of surrender, "it has held onto me!"

CHAPTER V.

In any New England state one can find Bakersville: a good-sized inland town where neighboring farmers come to trade on Saturdays, when Main Street is lined with teams and trucks. Its Common is bordered by ancient elm trees, amid whose boughs white churches lift their spires. There are rows of fine old pillared mansions—which seem to look down scornfully on the occasional dwelling of less stately architecture—quiet side streets, and winding byways.

The town lies in a valley, through which the river takes its course quietly and decorously, as a river should. In spring-time, when it floods the meadows, it stops considerably at the roadside, making as little trouble as possible for passers-by. Hills surround Bakersville on every side, sheltering it from cold winds in winter, but turning it into an inferno during July and August, so that the place has not been overrun by "summer people." Sometimes an artist braves the heat in order to paint the loveliness of the surrounding country. Occasional boarders come to farms on the hillside outside the town; but as a rule the inhabitants of Bakersville have been born and bred there.

On a May morning, four years after that day when Simeon Bartlett gave his wise definition of the word "freedom," Nicholas Hastings stood in the doorway of the First National Bank of Bakersville, and drew a deep breath, preliminary to going in to the day's work. Spring was in the air and the tree-tops, painting the budding maples red—turning the orchards into bowers of beauty—tugging at Nick's heartstrings with the old, familiar urge.

Even Main Street, the least lovely part of Bakersville, looked alluring. Store doors stood open, welcoming the warm air that was to make short work of the accumulated stuffiness of winter months. At his fruit stand opposite, G. Leveron was building a mound of oranges and pineapple, their golden beauty seeming a part of the bright sunshine; and at the post office across the way the R.F.D. man was starting out upon his rounds.

"Gosh! I envy him!" said Nick, and did not know that he spoke aloud till some one answered.

"I do myself, Nick. A great day to be out. I've half a mind to desert the ship and take a holiday."

Nick turned with a smile to the bank's president, who had spoken.

"A holiday? I've almost forgotten what the word means. Take one by all means, Mr. Maxwell. I guess we can worry along without you!"

John Maxwell laughed.

"I'd jump at that advice if my car wasn't in the paint shop. As it is—"

He stopped, suddenly aware that Nick's attention had wandered. A blue roadster was standing before the post office, from which stepped a slender woman in a crisp gown that thing like and graceful in her figure that caught John Maxwell's eye. Pausing on the top step, she turned, and perceiving Nick, waved a greeting to which he responded with a gay

gesture and a quick lighting of his eyes, which, though lost on the lady across the street, was quite visible to the keen gaze of the bank president.

"Your new neighbor?" he queried, as she turned about.

Nick started, as if his thoughts were far away.

"Yes, Nic people—the Hallidays, she's an artist, you know. Her husband writes."

"Any children?"

"No, I believe they have some sort of notion that children would hamper their careers."

John Maxwell snorted with indignation.

"That's all I care to hear about 'em. How's Gay?"

Nick faced his questioner.

"Gay? What made you ask, sir?"

"Thought last time I saw her she looked seedy. Didn't like it, I'm very fond of Gay."

Nick smiled.

"I'm fond of her myself!" Then he said soberly: "The both indulged in whooping cough, you know, and Gay lost sleep. She's not been quite right since—tired, I guess. Well!" (with a reluctant glance at the town clock), "I suppose I must retire to my cage."

"A cage—for Nick?" murmured John Maxwell as the boy left him. He stood for a moment watching the lady in the blue roadster ride away. He frowned. Then his thoughts flew to Gay, and his face softened. "She's in a cage, too," he thought wisely, "only she doesn't guess it. Bless her loyal heart! Well, I trust their new neighbor will keep her hands off Nick—and her eyes, too! She hasn't any babies to lose sleep over. No wonder she looks fresh as a new-blown rose."

Then, as reluctantly as Nick, he too, entered the portals of the First National Bank. But business was not pressing that morning, and his thoughts wandered. Why, he thought irritably, hadn't the janitor extinguished the furnace fire? The pipes of the radiator were still warm. He arose, opened another window, and in desperation threw wide the door to his private room. At eleven o'clock he decided he couldn't stand it. Passing Nick's cage he said: "I'm taking your advice—till after dinner. Thunder! this place is stifling! Why don't you open something more?"

Nick made a discouraged gesture toward a stenographer.

"She's got a cold. She always has a cold—can't stand a draught, so the rest of us suffer. A draught, on a day like this! If you'll kindly forget to close the door when you go out I'll award you a medal for saving one life at least."

"It would be the first I ever received," laughed John Maxwell as he obeyed.

He stepped outside, drawing in a deep breath of the welcome air. His home lay to the north, but something drew him in the opposite direction—possibly the sight of a blue roadster turning a corner. He followed it, and came out on the house once occupied by Selma Smith. There he paused, surveying the old-time garden that had been restored. A rickety cow shed had vanished, and in its place stood a trim garage, connected with the house by a pergola, which would soon be a wealth of climbing roses.

It was a good old house, thought John Maxwell. He was glad the new people hadn't spoiled it with a tower, as the man who bought the Blodgett farm had done. Give it a year or two, and the garden would be a thing of beauty. And it was good to see a coat of new white paint, even though it made Nick's house next door look shabby. Yes, it did look shabby; but there was no denying the fact; but painting cost in these days, and the boy's expenses had been heavy the last three years.

(To Be Continued.)

Some say the answer to "How can I live without her?" is "much cheaper."

YOUNG WIFE STRENGTHENED

After Taking Lydia E. Pinkham's Vegetable Compound

Bancroft, Ontario—"When I first took Lydia E. Pinkham's Vegetable Compound I had been married about a year and my strength was leaving me on account of my condition. I was only 19 and it was my first child. My mother told me I needed something to steady my nerves and a girl friend told me to take the Vegetable Compound. I am so thankful I did because it strengthened my whole system and now I feel perfectly well and have a sweet little boy."—Mrs. J. B. STALKER, Bancroft, Ontario.

Wonderful Diving Outfit

German Device Enables Man To Work At Great Depth

The salvaging of the German navy from the bottom of Scaupa Flow was perhaps the biggest job of the kind on record. A wonderful feat it was, made comparatively easy, however, by the fact that the fleet lay in shallow water.

Hitherto, no great feat of salvage has been accomplished at a greater depth than 300 feet, and very few at that depth. But a German firm has constructed—that is the right word—a diving outfit that enables men to work at 400 feet or more. The Lusitania is in 500 feet of water off the coast of Ireland, and it is expected the divers will be able to get at her if they want to.

The German outfit can scarcely be called a diving suit. It is a steel house, from inside of which its single tenant is able to work. The head-piece is as big as the conning tower of a submarine. With its 5,000 can-disperser and other apparatus, the German outfit is front to penetrate the Stygian darkness of the sea hundreds of feet below the surface. It looks like a fabled monster. The working tools are manipulated from the inside of the outfit, and the divers have special devices to overcome pressure.

There are thousands of ships down in Davy Jones' locker, containing, in the aggregate, money, gold and silver bars, jewels and other imperishable treasure of untold value. Most of it is probably irrevocably lost, but science is going to wrest a lot of that gear from the Old Man of the Sea in the not very far distant future.

A Simple Treatment For Children's Colds

Cold in the head is very common at this time of year, especially in the very young. Neglect of a cold is prone to lead to serious consequences. To relieve all congestion of the system is the first step in treating a cold in the head of a child. For the very young, Baby's Own Tablets are the ideal means of doing this. Containing no narcotic or other harmful drugs they soothe the child's fretfulness, relieve its suffering and ensure convalescence.

Baby's Own Tablets are without an equal for relieving indigestion, constipation and colic. They check diarrhoea; break up colds and simple fevers; promote healthy sleep and make the dreaded teething period easy. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Provincial Air Service

May Be Inaugurated Soon In the Western Provinces For Forest Protection

Inauguration of provincial air service in the prairie provinces for forest protection may follow as a result of the transfer of natural resources, it is learned.

This phase of forest protection will be discussed between Dr. Hon. R. B. Bennett and the premiers of the three prairie provinces on the return of the federal minister from London, England, it was stated by Premier Anderson at Regina. In lieu of instituting a provincial service in each province, an arrangement may be reached between the provincial and federal governments for the use of the Royal Canadian air force machines in forestry service.

Discussion of this matter came before the natural resources conference held at recently at Edmonton.

New Canadian Destroyer

The second of Canada's two new destroyers, the "Skeena," was successfully launched at Southampton recently. Miss Mildred Bennett, sister of the Canadian Prime Minister, performing the christening ceremony before a distinguished gathering. The destroyer was gracefully into her element bearing a large maple leaf across her bows.

"Buy a ticket for your concert? But I don't know you." "Yes, you do, sir. I'm the man who turns your watch off when you don't pay the rates."

Every 40 seconds someone is either injured or killed by present day modes of transportation, experts claim.

Use Minard's Liniment for Tooth-ache.

Idea Proved Effective

Dresden Painter Tried New Way To Collect Money

A new and effective method by which an artist may exert gentle pressure upon an unwilling subject of a portrait, has been successfully tried at Dresden. A young, unknown painter, having nearly finished a commissioned likeness of one of Dresden's leading industrialists, was told that the agreed upon sum of \$500 would not be paid. The industrialist declared that the portrait bore not the slightest resemblance to him. The artist respectfully asked if he might have this statement in writing, as he had borrowed money on the expectation of being paid and wished to be able to show his creditor why he could not meet his obligation. To this the industrialist agreed.

Shortly thereafter at an exhibition a painting appeared entitled "Portrait of a Well-Known Swindler." Dresden, recognizing the likeness, laughed. The industrialist visited the exhibition, flew into a great rage and demanded the immediate removal of the picture. The artist blandly produced the signed statement asserting that the portrait bore no resemblance whatever to the sitter. The upshot was that the industrialist decided to buy it for \$1,000.—New York Times.

League Of Nations

Sir George Foster Sees Lack Of Interest Shown In Work At Present Time

Apathy towards the League of Nations is at the present time very apparent in Canada, in the opinion of Sir George Foster. At a meeting here of the central executive of the League of Nations Society of Canada, Sir George declared he had gained this impression in travelling over the Dominion last summer.

The Dominion government was apparently going to be up against a big problem in preparing its budget next year owing to prevailing conditions, Sir George told the executive, and he added the opinion that the society could hardly look for any increase on the grant the government makes for the carrying on of the society's work.

An intensive speaking campaign was one suggestion made as a means of reviving interest in the league and enlisting financial support. Sir George volunteered his services for a number of meetings if decision is reached to appeal to the public in this manner.

Interested In Grain Show

Directors of the Co-Operative Wholesale Society of Great Britain, who recently concluded a tour of Canada, have expressed themselves as greatly interested in the World's Grain Show to be held at Regina in 1932, and have indicated that in all probability they will visit the Exhibition and Conference at that time.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

New German Money

The Germans this fall are going to be presented with a new kind of paper money that has some remarkable claims made for it. It is a new type of paper currency guaranteed not to burn, tear or crumple.

FEEL MEAN?

Don't be helpless when you suddenly get a headache. Reach in your pocket for immediate relief. If you haven't any Aspirin with you, get some at the first drugstore you come to. Take a tablet or two and be rid of the pain. Take promptly. Nothing is gained by waiting to see if the pain will leave of its own accord. It may grow worse! Why postpone relief? There are many times when Aspirin tablets will "save the

"Into Thine hand I commit my spirit."—Psalm xxxi. 5.

Father, Thy hand the wild bird brings With fearless flight, from shore to shore, Safe in that sheltering peace it sings, However the tempest roar.

So tossed, so frail, so lone am I, Except that hand my guidance be, Hear Thou my fearful, hopeful cry, Dear Lord, lay hold of me.

—Rose Terry Cooke.

Cling fast to the hand that is leading you, though it be in darkness, though it be in deep waters, you know whom you have believed. Yield not for a single moment to misgivings about future storms. Infinite love, joined to infinite skill, shall pilot the way through every strait and temptation.—J. Alexander.

Persian Balm is a true elixir of youth. Refreshes and rejuvenates. Adds a youthful charm to the complexion. Softens and beautifies the skin. Makes hands flawlessly white. Indispensable to the woman who appreciates subtle distinction. Delightful to use. Delicately fragrant. Soothes dry and irritated skin. Corrects and preserves. A flawless toilet requisite for every discerning woman. A true aid to beauty.

American Author Wins Nobel Prize

Sinclair Lewis Chosen For Honor This Year

Sinclair Lewis, noted United States author, has been voted the Nobel prize in literature, for 1930.

Sinclair Lewis was among United States authors prominently mentioned for the 1930 Nobel prize in literature which this year sets a new record of \$45,350. Theodore Drisler was prominently mentioned. Among the best known books of Mr. Lewis are "Main Street," published in 1920 which brought him into international notice; "Babbalanza" in 1922, "Arrowsmith" in 1925, and "Elmer Gantry" in 1927.

Banish pain with Minard's Liniment.

It was a wise man who said: "Smartness enables a man to catch on, but wisdom tells him when to let go."

If baby has COLIC

ACRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and never harms. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels, colic or constipation, or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And in more liberal doses of Castoria is always better for growing children than strong medicine meant only for adult use.

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

Heard Around Town

Wesley Seeger is at present acting as barber at Lanfine.

Miss Beulah Vennard is visiting friends in Calgary for a week.

Chas. Wylie, druggist, of Hanna, was a Chinook visitor last Tuesday.

Mrs. W. A. Todd will entertain at two tables of bridge this (Thursday) evening.

Mrs. A. V. Youell is entertaining a number of ladies to afternoon tea Thursday.

Frank Sayers shipped a half car load of hogs from this point to Calgary last Tuesday.

Mrs. Shand, who has been in Calgary for the past two weeks, returned this morning.

The dance which was advertised at Cloverleaf school Nov. 21, has been postponed to Nov. 28.

Mr. and Mrs. W. W. Isbister were Youngstown visitors on Sunday, the guests of Mr. and Mrs. Campbell.

Miss Agnes Gingles, who has been visiting at the home of her mother, returned to Edmonton last week.

Miss Audrey Neff, teacher at Rearville school, spent Saturday at the home of her parents, Mr. Mrs. C. E. Neff.

All the ladies who have work ready for the Bazaar are requested to send the same to Mrs. Meade before Thursday, Nov. 27th.

The Ladies' Aid will hold a Bazaar and Tea at Chinook on Saturday, November 29th, in the Cooley Garage, commencing at 3 p.m. sharp.

W. S. Lee, who recently underwent a minor operation at Cerebral hospital, returned to his home on Sunday, and is feeling much improved in health.

Mrs. Fred Belmont, who recently underwent an operation at an hospital in Calgary, returned home Sunday morning. We are glad to report that, though still very weak, she is progressing as well as can be expected.

Don't forget the School Concert and Dance in the Chinook school on Friday, Nov. 21 (tomorrow). Everyone come and have a good time and help the Christmas tree fund. Concert will start at 8 o'clock sharp.

Ed Stewart, Naco, H. Dunster, R. Stewart and son, Harold, Chinook, are Calgary visitors this week. Mr. R. Stewart, who was appointed the delegate of Collingwood Municipality, is attending the Municipal convention in that city.

The regular weekly meeting of the Ladies' Card Club was held Tuesday evening at the home of Mrs. W. A. Todd. The highest score of the evening was held by Mrs. Rennie, who received a pretty bon-bon dish. Next week's meeting will be with Mrs. Clarence Peterson.

Curling Club Elect Officers

A good representative meeting of Chinook Curling Club was held on Monday last, Nov. 17, when the following officers were elected for the season 1930-31:

Hon. President, J. Rennie.
President, S. H. Smith.
Vice President, W. Meade.
Secretary, C. J. Bennett.
Executive com., Wm. Meade, W. Milligan, W. A. Todd.
Ice committee, W. A. Todd, W. Milligan, W. Meade.
Draw Master, L. S. Dawson.
Entertainment, E. E. Jacques, O. Nelson, C. Peterson.

Trail Rangers

At the first meeting of the Trail Rangers nominations were held for officers. The results were: President, Leonard Youell; Secretary, Wesley Gilbertson. The

members are Chester and Lorne Rideout, Earl Robinson, Wesley Gilbertson, Lyle Milligan, Leonard and Billy Youell. Billy Youell and Chester Rideout were initiated during the second meeting of the Trail Rangers. They received their T.R. pins and badge books. Mr. Woollett has again taken the position of mentor. The fees were decided at 10c a month. The meetings are held at 4 o'clock in the waiting room of the station.

Peyton Pickings

The Laughlin dance was fairly well attended, considering weather conditions. An enjoyable time was had by all present.

The following were guests at a dinner served by Mrs. Herbert Rudy, of Youngstown, on Sunday, Nov. 16th: Mr. and Mrs. Ole Rudy, Mr. and Mrs. Kjemus and family, Mr. and Mrs. A. Bjornsrud and Miss Ida Marcy.

Mrs. Fred Belmont returned home Sunday morning from Calgary, where she has been receiving medical treatment. She is doing well after her operation.

What Care They If Prices Fall

There are in Alberta some farmers and their families who accept these days of bottomless wheat pits and tumbling stocks with a good deal of equanimity. One such family is described by the St. Paul Journal. The item is worth quoting in full:

Mr. and Mrs. Z. A. Lefebvre, their 18 sons and daughters, in spite of economic depression, do sympathize with the rest of humanity less fortunate than they. Mr. Lefebvre writes in his usual versatile manner that they have 700 bushels of potatoes off one and a half acres, 1000 bushels No. 2 Garnet and 1000 bushels Reward wheat; 1000 bushels oats; barley, peas and no less than 1000 cabbage, 20 bushels carrots; 50 bushels beets, oodles of turnips; 12 bushels onions; 33 yards of tresses of garlic; celery, soup herbs, cases of raspberries; canned and preserved beans, peas, beets, small fruits, etc., and 330,000 feet board measure sawn lumber. Now with a few thousand pounds of Cold Lake salmon trout to sell to the outside world, Mr. Lefebvre can wait until the gamblers recover from the Wall street crash.

Six Year Old Not Sure Where He Came From

Little Henry McKinstery, age 6, who arrived in Winnipeg recently, unaccompanied, on "The National" from Toronto, is not quite sure where he came from. When questioned by passenger officials there, he first maintained that he

GET THE LOWDOWN ON TIRE BUYING!

WE feature Goodyear Tires because we know they're the most satisfactory and biggest-value tires on the market to day. But you don't have to take our word for it. We've got two tests which will prove it.

Come to our shop and press your hand on the Goodyear All-Weather Tread. That's test number one. You'll feel the grip of the deep-cut, sharp-edged blocks which are placed in the centre of the tread—where they belong.

Test number two. See for yourself on our cord-testing machine that Goodyear Supertwist Cord used in all Goodyear Tires has far greater stretch than ordinary cord. This extra stretch gives the Goodyear carcass its great vitality, enabling it to withstand road-shocks.

That's how to get the "low-down" on tire value. It's fun making the tests. Come in next time you're passing.
